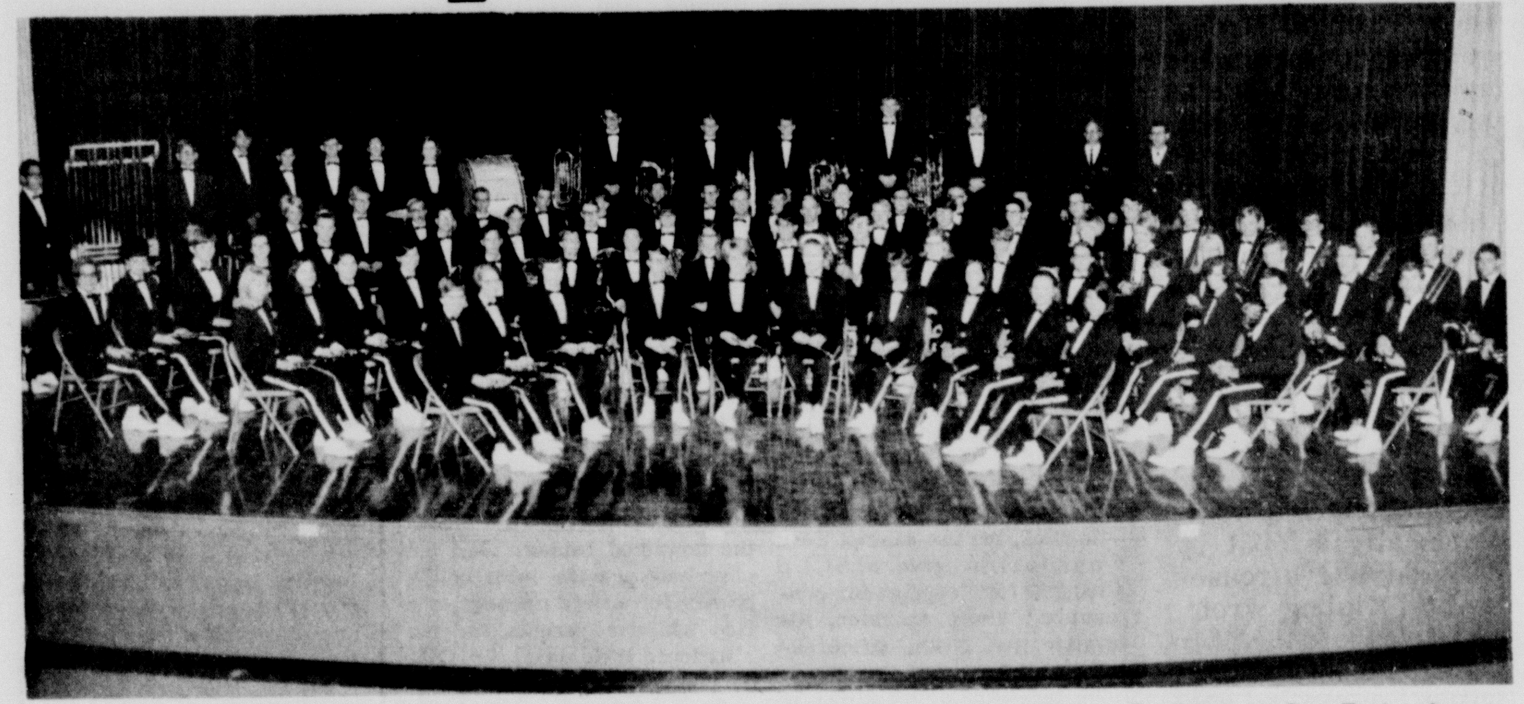
Canyon Band First In State



The Canyon High School Band was named the outstanding Class AAA band in the state Sunday by the Texas Music Educators Association. The announcement was made at the Texas Bandmasters Association meeting. Band director Gary Zook and members of the band will be honored with a reception Saturday night.

Reception Is Set Saturday

BY ELAINE PEEPLES

Canyon has the best Class AAA high school band in the state.

The selection of the Canyon band was announced Sunday in San Antonio at the Texas Bandmasters Association meeting.

Canyon was named by a panel of five judges of the band division of the Texas Music Educators Association.

The judges listened to tape recordings of a public performance of one band from each of the 15 regions in Texas to make their decision.

The Canyon band will be one of two guest bands at the annual convention of the Texas Music Educators Association in February in Dallas.

An award will be presented to the band at that time. The other band to play in the concert will be a Class A band.

Gary Zook will be back in Canyon Saturday afternoon from the bandmasters meeting in San Antonio.

Members of the band have arranged for a police escort for him through Canyon, according to Rick Wester, drum major.

Members of the band will meet all day Thursday and Friday afternoon to decorate the band hall and make posters to be placed in Canyon stores.

The posters will be placed in store windows Saturday morning, Wester said. He said that members of the band were to bring all the cars they can find to the band hall Saturday afternoon to be decorated.

Band members plan to then meet Zook at the roadside park south of town and escort him in.

A reception has been planned by band members and the Band Parents Association from 8 p.m. to midnight Saturday in the band hall, Wester said.

The Canyon band has earned 12 superior ratings and three excellent ratings in University Interscholastic League competition since Zook has been the band director, according to Terry Milligan, assistant di-

(See BAND, Page 10)

Local Voters To Polls For Special Election

Randall County voters will go to the polls Tuesday as will voters across the state to ballot on nine constitutional amendments.

Polls will open in Amarillo precincts at 7 o'clock Tuesday morning and in the remainder of the county at 8 o'clock. Polls will close at 7 o'clock Tuesday evening over the entire county.

Sixty-four had voted absentee on the amendments as of Wednesday morning.

Fourteen had voted in the county clerk's office in Canyon and 50 had voted at the south Amarillo office.

Friday is the last day to cast a ballot absentee.

A summary of the amendments is as follows:

Amendment 1--would repeal the obsolete, superflous and unnecessary sections of the Constitution.

Amentment 2--would broaden the powers of the Texas Water Development Board to allow them to provide a water plan for Texas.

Amendment 3--provide for higher salaries for the lieutenant governor, the speaker of the house and legislators.

Amendment 4--exempt nonprofit water supply corporations from taxation.

Amendment 5--would raise the maximum amount to be paid per year for assistance and medical care for the needy to $80,000,000.

Amendment 6--remove the constitutional interest rate limitations for bonds issued.

Amendment 7--provide for assistance payments to surviving families of governmental officers, including volunteer fire departments and reserve police units, who are killed in the performance of their duties.

Amendment 8--authorizes the legislature to provide additional loans to students at institutions of higher learning under the Texas Opportunity Plan.

Amendment 9--provide for annual legislative sessions.

The voting places for precincts are: precincts 15 and 20 at Ridgecrest school, 12 and 14 at Coronado school, 10 and 11 at South Lawn school, 9 at Alice Landergin school, 19 at Caprock High School,

Precincts 2, 3 and 4 at Ralph Switch; 7, 8 and 18 at Umbarger; 1, 13, 16 and 17 at Rex Reeves Elementary School in Canyon and 5 and 6 at Gene Howe School.

About eight per cent of the registered voters cast ballots in the constitutional amendment election two years ago, according to County Clerk LeRoy Hutton.

Hutton said they were expecting about the same percentage this year.

There are 19,339 registered voters in Randall County this year and an eight per cent turnout would be 1,547 voters.

SEN. RALPH YARBROUGH

50 Canyon Students Graduate

Fifty students from Canyon are listed among the 398 candidates for graduation at the summer convocation of West Texas State University Aug. 21.

U. S. Senator Ralph W. Yarbrough of Texas will deliver the commencement address which will be in the Amarillo Civic Center Coliseum.

Seeking master of arts degrees are Almira Ruth Holladay, Joseph Lee Lukonic, Jerome R. Warner, Linda Barker Warner and Jane Headlee Westberry.

Tracy L. Cox and Donnie J. Smith are candidates for the master of science degree.

Candidates for the master of business administration degree are Alice L. Bell, Charles William Boyd, Rita Carol Longan and Jon S. Stilp.

Those planning to receive master of education degrees are Jane Ann Hall, Harry Morgan Hendrickson, Wilburn Vernel McAlpin, Lewis Bonnell Riley and Sammye Waldrop. Jeanne Weldon is seeking the bachelor of arts degree.

Candidates for bachelor of science degrees are Sherie Lynn Braboy, Sam S. Brillhart, Aubrey Wayne Cooley, William Raymond Cox, Kenneth Aubrey Crossland, Sheila Bobay Eckles, Cynthia Ann Franklin, Billy Von Frogge, Jimmy Gerald Glenn, John David Harper, Carolyn Diane Kerbel.

Sherry Kay Killingsworth,

(See STUDENTS, Page 10)

Commissioners Back Omnibus Courts Bill

In a split vote Monday Randall County commissioners court gave its backing to the Omnibus Courts Bill which would have established a 181st District Court with jurisdiction in both Potter and Randall Counties.

Commissioner Bill Butler made the motion which was seconded by Commissioner Jim Fletcher. Commissioners Fletcher, Butler and Glenn Dowlen voted affirmatively while Commissioner Clarence Beckman voted no.

Beckman was the strongest proponent of a separate court for Randall County and Butler was just as strongly opposed.

County Judge Carroll Brown said a court with dual jurisdiction would allow some types of Randall County cases to be heard in Potter County if it were more convenient for the people involved.

"It would be more convenient for 85 percent of the people of Randall County," he observed.

"Convenient for 85 percent of the attorneys," Beckman retorted.

Butler contended that there are not enough cases to justify a separate court for Randall County and that in having such a full-time court excessive expense to the county would be incurred.

"The judge of a separate court for this county ought to develop into the best domino player in the world," declared Butler.

He pointed out that the present district judge, Judge Gene Jordan, sits in Randall County about 20 days a year. He said there is a good possibility that a 181st District judge might have offices in the Randall County court house since office space is available here and not available in the Potter County court house at the present time.

Butler argued that dual jurisdiction would give speedier court service to people in both Potter and Randall Counties since it would enable the judges to divide the work load.

Records show that the court load in Potter County is about three times greater than that of Randall County.

Beckman made a motion that commissioners court "do everything possible to get that court in Randall County."

Dowlen seconded the motion. Dowlen and Beckman voted yes and Fletcher and Butler voted no. Judge Brown cast the deciding no vote.

Fletcher explained his no vote by saying he does not feel that the county would be justified in paying the necessary extra expense to maintain a separate district court.

"I think that when the time comes that we need it, we'll get it," Fletcher declared.

Butler made a motion that Randall County commissioners endorse the dual jurisdiction court bill with the understanding that when Randall County's work load develops "we will be considered for a separate court."

It all amounted to a moot discussion.

Governor Preston Smith vetoed the Omnibus Court Bill which was passed by the legislature in regular session.

The governor can stipulate the matters on which action can be taken in the present special session. He has indicated that until state lawmakers come up with a two-year appropriations bill and a tax bill to support it no other legislation will be considered.

Commissioners tabled a plea

COVERING FUMBLES

by
Dean Milton Jones

I spent an hour with a Sears Roebuck catalogue for the year of 1897. The items offered and the prices were almost as amazing as our boys' flight to the moon.

DR. J. A. HILL

Dr. J. A. Hill Will Move

West Texas State University President Emeritus and Mrs. J. A. Hill are moving away from Canyon.

They have sold their home here and will move about the middle of next month to a retirement home at Georgetown, near Austin.

They have two sons connected with the Austin school system and are making the move in order to be near them.

Dr. Hill came to Canyon in 1910 as a member of the West Texas State Normal College faculty. He succeeded Dr. R. B. Cousins as president of the institution in 1918.

He held that post until retirement in 1948.

The Hills will live at the Wesleyan Retirement Home in

(See MOVE, Page 10)

45 Year Old Check Found

The date was July 27, 1924, 45 years ago.

The man was T. C. Thompson of Thompson Hardware which dealt in hardware, implements, furniture and undertaking.

The payee was Harbison Manufacturing Co. and the amount, $29.65.

These are the particulars on a check found near Imperial Chevrolet Co. by Mr. and Mrs. Bill Watson who live west of Canyon.

The check was written on the First National Bank, Canyon, Tex.

Clarence Thompson told Mrs. Watson to keep the check as a souvenier if she wished.

Thompson said that several people had reported finding the checks after the old warehouse was torn down but this was the first one he had seen.

He said that Thompson's owned the warehouse at that location for about 40 years and sold it about three years ago. He said he thought all the old records had been destroyed.

Plainview Wins Race

Over 1,000 persons watched Saturday night as the Plainview Red Team took first place in the World Champion Pony Express Tournament in Canyon.

The Swisher County Sheriff's Posse took second place and the Rolling Hills Riding Club of Amarillo took third place.

Janice Allen, National Queen of the American Association of Sheriff's Posses and Riding Clubs, presented the trophies to the winners.

The high point team members received traveling saddle bags and silver buckles and trophies were awarded to the second and third place winners.

Eight teams participated in the tournament.

Mrs. M. B. Simms of Canyon was the winner of the half of beef given away at the tournament held in the Randall County Sheriff's Posse arena.

At the parade held Saturday afternoon, the Swisher County Sheriff's Posse took the first place trophy for the best riding club in the parade.

The Rolling Hills Riding Club of Amarillo took second place trophy and the Hereford Riders were third.

About seven riding clubs from over the area participated in the parade.

Smith May Visit Here Next Fall

Governor Preston Smith may make a trip to the Canyon area next fall.

State Rep. Bill Heatley of Paducah is reported to be making arrangements for the governor to visit the proposed route of a scenic road through Palo Duro Canyon in October.

Eddie Knowles told the Canyon Chamber of Commerce Monday night of the governor's proposed visit. Knowles is vice president of the Canyon Chamber and a member of the board of directors of the Palo Duro Scenic Road Association.

The announcement had not been confirmed by the governor's office at mid-week.

Knowles attended a meeting of the association board Saturday at Clarendon. He made a full report to the Canyon Chamber board at the Monday night meeting.

The Canyon Chamber agreed to contribute $250 to the association.

Members of the Chamber Red Carpet Committee will greet Panhandle Hereford Breeders

(See SMITH, Page 10)

Panhandle Water

(An Editorial)

This week a special section of The Canyon News is devoted to explaining proposed Amendment No. 2 which is to go to the Texas voters Tuesday.

We will not dwell on the contents of the amendment as they are adequately explained elsewhere.

The Panhandle needs water, 20 million acre feet of it a year. It is of the utmost importance that we have this much imported water within the next 16 years.

Hydrologists tell us that irrigation from underground sources will be a thing of the past in the Panhandle by 1985.

Are we to sit by and see the vast agribusiness industry we have worked so hard to build simply dehydrate and die? It will if we do not get that water!

Work must begin soon on the vast canal to bring water from the lower Mississippi if we are to have it in time.

Water is just as important to the Texas city dweller as it is the the Texas farmer. All of us trace our livelihood ultimately to the soil.

We urge you to go to the polls Tuesday and vote for passage of Amendment No. 2.

Woman Injured

A Plainview woman was injured Wednesday morning about eight miles south of Canyon on Interstate 27 when her car went out of control and skidded 150 yards.

Mrs. G. G. Smith was traveling north alone when the accident occurred.

She was taken to Neblett Memorial Hospital in Canyon. Her injuries were not believed to be serious, according to Ray Tinsley of the Randall County Sheriff's office.

Mrs. Smith skidded across the four lanes of the highway, went through a fence, and knocked down a telephone pole before her car came to rest against a railroad embankment on the west side of the road.

Officers speculated that she had a flat on the right rear tire of her car to cause it to go out of control.

Dr. Charles Nester of Neblett Hospital said Mrs. Smith suffered a fracture of the left shoulder and of the back and was transferred to Northwest Texas Hospital.

He said her general condition was excellent.

Hereford Breeders Tour Set

A two-day tour by Panhandle Hereford Breeders Association will begin here the morning of Aug. 11.

The tour will assemble at 8 o'clock at the West Texas State University Farm. The group will be served coffee and doughnuts by the Canyon Chamber of Commerce Red Carpet Committee.

Leaving Canyon, the group will visit Hereford ranches over the Panhandle.

Janice Allen presented the second place trophy to James Stockett of the Swisher County Sheriff's Posse Saturday night at the Pony Express Races held at the Randall County Sheriff's Posse Arena.

FROM THE CANYON RIM

The headline in the Amarillo paper Tuesday read, "Smith eyes consumer's pocketbook."

Of course, the headline referred to Smith's recommendations to the special legislative session. The governor asked for a sales tax increase from 3 to 3 1/2 percent to raise $159.3 million.

Other items in his tax package include an increase in the motor vehicle sales tax from 3 to 3 1/2 percent to raise $27 million; addition of three cents per pack to the 11-cent cigarette tax to raise $53.7 million; placing alcoholic beverages under the sales tax, $39.6 million; and increasing the corporation franchise tax, for two years only, by 50 cents per $1,000, netting $27.9 million.

Liberals in the legislature attacked the recommendations as having no relation to the ability to pay.

In simple truth, almost all taxes ultimately are consumer taxes.

Whether you tax the gasoline at the pump or levy a tax on the corporation which refines it, the man who buys it and uses it ultimately foots the bill.

Recommending taxes doesn't come easy for a man like Preston Smith. He would much rather abolish some of the taxes we already have but the people (the consumers) don't want it that way.

They want Texas teachers to get higher pay. They want better schools for their children, more institutions of higher learning, higher pensions for the old folks, better roads ad infinitum.

Preston Smith is committed to the progress of Texas.

A realist, he is not a man to beat around the bush. He submitted a tax program that is reasonable and workable. I think he is to be commended for doing so.

* * *

I don't see how the Nixon administration is going to avoid resorting to some type of price and wage freeze.

High interest rates do not seem to be curbing infaltion. They may bring on a recession.

Take the Canyon community, for instance. Over the past decade building for a growing population has been one of our principal industries.

High interest rates have cut building short. The economy has suffered.

I talked to a knowledgeable lawyer only this week who thinks a price and wage freeze with some loosening of money is in order.

He explained that many big city banks with small bank depositors are suffering because the smaller banks are beginning to need their money at home. The deposits are being called in.

He said large insurance companies are going to be hardest hit in the next few months as policy holders borrow money at a low interest rate specified in their policies.

For example:

John Doe has $10,000 cash value in an insurance policy. The insurance company has long since made a house loan at 5 1/2 percent with the money Doe paid in as premium.

Doe suddenly demands his cash value at 5 percent interest. The company must go to the money market and borrow money for the loan at a much higher interest rate. Thousands of John Does doing this means that the company is losing substantially.

* * *

Even Democrats close to Teddy Kennedy seem to agree that the Massachusetts Senator will not be a candidate for the Presidency in 1972.

This opens up more political possibilities.

If Richard Nixon does not deal successfully with inflation and Vietnam soon he will be vulnerable. At the moment Teddy's political demise leaves the Democrats without a viable challenger.

Edmund Muskie?

He has never really been tested in the idealogical fires. He has not been a great Senate leader, although he did a creditable job as a campaigner in his race for vice president in 1968.

His residence, being so far removed from the mainstream, USA, is a liability.

Hubert Humphrey?

There will be no Lyndon Johnson in the wings to help him even get the nomination in 1972.

John Connally could probably win the Texas Senatorial race next year. If he were to do so and it were not for the stereotype Johnson has hung on all Texas politicians, Connally might emerge as the Democratic frontrunner.

With the nomination and the financial backing and prestige that goes with it, Connally's movie-star good looks and his impeccable oratorical ability would make him a formidable opponent for any but a securely entrenched incumbent.

Youth Week In August

First United Methodist Church of Canyon will have a youth activities week named "SOW What Week" meaning Solve Our World.

Dr. Charles Lutrick, district superintendent, will be guest speaker for the week August 10-13, 6:30 to 9 p.m.

Food, fun, fellowship, spiritual growth and discussion will highlight the sessions. Sessions on Sunday, Monday and Wenesday nights will be at the church and on Tuesday the activities will be in the home of Mr. and Mrs. Keith Jones, 2417 Eighth Avenue.

Students will identify with "SOW What" tags challenging each person to ask the meaning during the week.

Best Are Slaughtered

TO THE EDITOR:

We make our living from purebred cattle. If we, every year, selected the finest, soundest young males from the herd before they were mature enough to breed and sent them to the slaughterhouse and kept only the defective, the lame, the halt, the undesirables to sire the herd, we would be out of business in about three generations.

Three generations in human life is 60 years. Beginning with the Spanish-American war at the beginning of this century, followed by World Wars I and II, the Korean conflict and now Vietnam, America has been following this practice. At the peak of their male potential, when they should be establishing homes and siring sons in their image to keep America strong, we have taken our most perfect specimens and sent them to the slaughterhouse. Make no mistake, Ares is a jealous, demanding god who accepts only the finest for his sacrifical maw!

For God's sake, America, look at history! Greece sent her best to slaughter in the long Peloponnesian Wars and to follow Alexander across the then-known world to infuse it with their superior Greek culture. The old and inferior were left at home and later when conquering Romans came, Greece fell. Rome in turn, sent out her legions--the policemen and terror of the ancient world and in a hundred years or so she was populated--not by the proud Roman senator of honor and integrity who would have spat upon a Nero or Caligula, but by weaklings who cried for bread and circuses and accepted degenerate rule. Kipling wrote, "And get the sons your sires have got, Then God will save the Queen!" England boasted that the sun never set on the British Empire and sent her Tommies to police the world--the finest ones who should have been home siring a Drake or a Nelson to keep England virile and strong. England's period of greatness lasted about 100 years.

I am not a maudlin pacifict. My husband volunteered for World War II with my blessing. I have a son in Vietnam. In a world that respects only force, that force must be answered in kind. I am against useless slaughter of even one boy while politicians designate military targets and argue whether the conference table shall be round or square. If this war is necessary enough to sacrifice one American boy--then it is necessary to win it on the battlefield where all wars are won or lost. Win it with whatever means it takes in the shortest possible time with the fewest possible American casualties. Bullies only respect and understand strength. Let's give the Communists a specified time to come to terms--like maybe 24 hours or the alternative of having Hanoi leveled, Haiphong destroyed and their population devastated if they get in the way. What is so sacrosanct about their civilian population? Are they more valuable than 30,000 of America's finest men who would be civilians but for senseless Communist aggression? And once this mess is ended--let America stop trying to police the world. Every nation in history that has tried it has failed and fallen in the effort.

America wake up! Time has run out. We have indulged in this slaughter for 70 years. We will become populated by the draft-card burners, the hippies, the dope addicts--the ones who are safe at home because of infirmities, either mental or physical. They are siring our race. Time has run out--but then, no nation has ever been smart enough to read history and avoid its mistakes.

In memoriam to Larry Padberg, age 23, killed in Vietnam May 12, 1969.

Claudia M. Braly, Ada

Our World

BY ANN BROWN

The "sexperts" so determined to promote sexology in our public schools can be classified only as ignorant, mad, or malicious. Anyone with experience with little children knows they, like monkeys, are prone to imitate what they see.

If our children are taught the mechanics of mating in the classroom, the majority of them will go right out and practice their new knowledge. Don't they rush home eager to read, write, and spell for their parents the minute they learn how?

The sexologists' argument that children should learn about sex in the classroom instead of the gutter is ridiculous. In the first place not all of us allow our children to frequent the gutter; and those who do pick up their sex information there know it is gutter behavior and not respectable. Classroom instruction puts it on a par with other learning: something to be constantly practiced.

After noting the impressive degrees following the names of the officers of SIECUS, one can scarcely brand them ignorant. And even a cursory examination of the shrewd planning, promotion and profit that SIECUS manifests, give ample evidence the sexologists are not mad.

In 1967, the tax-exempt Ford Foundation gave SIECUS $350,000 for "support for professional staff expansion, administrative costs, office expansion."

Isadore Rubin, treasurer of SIECUS, is also editor of Sexology. Think of all the new customers he will gain for his degenerate magazine if he can get our school children preoccupied with sex.

That leaves only one alternative: The Sex Information and Educationl Council of the United States is malicious.

The SIECUS people are already wealthy, so money cannot be their primary purpose in sex promotion. What, then, is their goal?

Dr. Mary Calderone, Executive Director of SIECUS, is quoted by Look magazine as telling 320 boys at Blair Academy that sex is for fun. She further advised the boys to separate themselves from their parents, and determine their own value systems. "Nobody from up on high determines this. You determine it," she said.

Someone from on high has set the penalty: "He that sows to the flesh shall of the flesh reap corruption." SIECUS would have school children forsake the standards of their parents, and spurn the teachings of their churches. But when venereal disease and illegitimate children follow in the wake of all the "sexual fun" who will pay the bills and pick up the pieces of the myriad broken lives?

It is usually the parents who pay the medical bills for promiscuous children, and care for the unwanted babies. And the churches provide most of the homes for unwed mothers, and find adoptive parents for the abandoned little ones. Dr. Calderone will not do it.

Promiscuous sex is probably mans' most expensive "fun." Free love is as nonexistent as a free lunch; somebody always has to pay.

The House of Delegates of the Association of American Physicians and Surgeons, Inc., went on record April 12, 1969, as opposed to sex instruction in our nations' schools. The doctors know who pays.

Sex involves tremendous energy. Obsession with sex blocks all other productive channels. Our "sexperts" contend that sex is essential to life and welfare, therefore it should be uninhibitied. Fire and water are also essential elements, but out of control they are the most destructive forces on earth.

Can our nation survive the debauching of a whole generation of our children?

Anyone who will examine the backgrounds of the SIECUS officials, will probably find ample reason for this pernicious plan to destroy our children, and consequently our nation.

Are American parents going to let them get away with it?

THE FIRST NATIONAL BANK In Canyon

DIVIDEND NOTICE

The Board of Directors of First National Bank in Canyon voted at their last board meeting to pay a dividend of 60¢ per share to shareholders of record at the close of business June 30, 1969.

This marks the 33rd year of consecutive dividends.

Capers Plan 'Fire Dance'

Canyon Capers Square Dance Club will host a "fire dance" August 9 for Louis and Betty Thomas, who lost their home in a recent fire.

The club met Monday evening with Knox Day calling and will elect their new club sweetheart at the meeting August 4. Leroy Pitt called tips at the meeting Monday.

The club will have a steak supper at Lake Tanglewood Saturday at the Floyd Thomas cabin.

Cooper's Market Adds 3 To Staff

Three new department managers have been added to the staff at Cooper's Market in Canyon, according to Benny Cooper, owner.

Archie Scott of 513 Twelfth Avenue, Canyon, has been named assistant manager for the store. He moved to Canyon from Hereford, where he was assistant manager for a Cooper's store there.

Named as the manager of the dairy-frozen foods department is Richard Hunnicutt who moved to Canyon from Tucumcari, where he was employed with Safeway.

Added to Cooper's staff as produce manager is Tom Platt, who has lived in Canyon since 1931. He was formerly produce manager for Bellah's in Canyon.

Platt and his wife, Nettie, have two daughters at home, Shirley and Kathy.

The Scotts have three daughters, Rhonda, 7, Konetta, 6, and Kimberly, 3. His wife is named Fay.

Hunnicutt and his wife, Faith, live at 509 Seventh Avenue. They have three children, Bryan, 6, Stephinie, 4, and Brint, 1.

Braboy's Canyon Girls Play Stinnett

Coach John Braboy's girls' softball team, the Undertakers, will play games Friday and Saturday night against the Stinnett All-Star team.

The Undertakers who in their regular season in Canyon were in second place are now playing under the name of the Canyon Girl's Softball Team.

Canyon lost to Stinnnett last Friday and Monday nights. The teams played Friday in Stinnett and the score was 15-6.

The score in the Monday night game was 14-7 but Coach Braboy said Canyon maintained the score at a tie for five of the seven innings of the game.

The coach of the Stinnett team is Dennis O'Bryant.

Braboy said this was the first time to his knowledge that a girl's softball team from Canyon had gone out of town to play a game.

He said he hoped these out-of-town games would help to promote a better grade of softball in Canyon.

"This has presented a more challenging game. It demands more of the players and promotes a better game," he said.

The Canyon team has also played several other games with out-of-town teams. The team beat Horace Mann of Amarillo July 18, 16-6. Braboy said Horace Mann was the second ranked team in Amarillo.

They also beat Alamo Catholic 20-19 July 14.

Braboy said he hoped to arrange a game with Fannin Junior High who hasn't lost a scrimmage or a conference game in four years of play and were the champions in Amarillo this season.

Members of the Canyon team are Sharon Reynolds, Wanda Heathington, Denise Hamblen, Robbie Morris, Zady Caldwell, Connie Davis, Janet Curtis, Winnie Johnson, Si Morris, Georgia Branstetter, Joy Williams, Virginia Branstetter, Penny Peckenpaugh, Carla Swatzell and Vicki Abbott.

Steak Supper For Capers

A steak supper for members and guests of the Canyon Capers Square Dance Club will be held at 6:30 p.m. Saturday.

The supper will be held at the Lake Tanglewood cabin of Mr. and Mrs. Floyd Thomas. Hosts will be Bob and Virginia Costley and Louis and Betty Thomas.

Nephew Drowns At Grapevine

Funeral services for Ralph Eugene Weaver, 22, will be conducted today, Thursday, at 2 o'clock at Bible Baptist Church in Dumas.

Weaver was drowned about 10 a.m. Tuesday in Grapevine Lake as he and a companion were apparently swimming below the dam.

Weaver is survived by his wife and daughter of the home, his mother, Mrs. Mamie Weaver of Trailer City, two sisters, two brothers, and grandparents.

Two of Weaver's aunts and uncles live in Canyon. They are Mr. and Mrs. Wayne Wilcox and Mr. and Mrs. E. E. Miller.

Champions Named In Goat Show

Grand champions and reserve champions were named in three shows Saturday and Sunday at the Tri-State Dairy Goat Association show held at the West Texas State University farm.

The grand champion Alpine doe was owned by James McCarty of Abilene and the reserve champion Alpine was owned by Mutt Conlin of Fort Worth.

The grand champion Nubian doe was owned by McCarty and the reserve champion by Mr. and Mrs. Roy Wagner of Amarillo.

In the buck show, the grand champion Nubian buck was owned by George Randell of Albuquerque and the reserve champion by Mr. and Mrs. Wagner.

The grand champion and reserve champion Alpine bucks were owned by Mrs. Azling of Nara Visa, N. M.

Lyman Stubblefield, president of the association, said 11 pure breed entries were in the show.

About 100 people attended the show as spectators, he said.

Stubblefield said the association plans to hold the show in Canyon again next year.

Buff Riders Have Playday

Buffalo Riding Club held a playday Sunday at their arena west of Canyon with the Sagebrush Riders, Pleasant Valley, Hereford and Canyon Clubs as guests.

Competitive games were played throughout the afternoon.

The past summer has included several improvements to the arena grounds with members working to erect a split-level press box and concession building to house the announcer, timekeeper, bookkeepers and snack bar.

Roy Forehand, house parent at the High Plains Children's Home and Tommy Cook who lives at the home, show off the new 1969 Ford pickup purchased for the home with Gold Bond trading stamps. Churches from throughout the area contributed stamps for the new pickup for the home. The pickup was purchased at Sid Stout Ford in Amarillo.

Duane Harp Earns Honor

Duane Harp, son of Mr. and Mrs. Bill Harp, has been selected as a candidate for the Vigil Honor of the Order of the Arrow, a lodge of honor campers elected by members of the boy scout troops to which the boys belong.

There are three steps in the Order of the Arrow. They include membership in Ordeal, Brotherhood, and Vigil which is the highest honor that the lodge can pay to any scout.

According to Llano Estacado Council executive, Alan Linthicum, there are probably not over fifty members in the entire council that now have the Vigil Honor.

Duane was one of thirteen persons, six adults and seven boys, to be selected this year at Camp Don Harrington. In order for them to become members, it will be necessary to participate in a special ritual and ceremony to be held August 8th.

Offices he has held since being an OA member for the past two years are those of Palo Duro Lodge treasurer, Administrative Vice-Chief of the Tejas Chapter, and Vice-Chief in charge of elections. He has also held membership with the OA Indian Ceremonial Dance Team. He has served on the staff at Camp Don Harrington for the past three summers.

Duane is a member of Boy Scout Troop #130 and his Scoutmaster is C. O. Hillman. He is a member of the Kwahadi Indian Dancers and is a Junior Assistant Scoutmaster of his troop.

He started his scouting in Cubs eight years ago when he joined Pack 97 sponsored by the First Baptist Church of Canyon. His Den Mother was Mrs. Roy Cates of the Gene Howe area. He has followed through with requirements of all the ranks of scouting and now holds the rank of Eagle Scout.

Duane has attended the Canyon Schools since entering the first grade at Rex Reeves Elementary School and will be a junior at Canyon High School this fall.

To Marlboro Country. . .

JOHN CARLILE of Canyon leaves Wednesday for a trip to "MARLBORO COUNTRY" at Sun Valley, Idaho where he will be filmed as the cowhand for magazine advertisements for the cigarette company. Carlile was "found" at the Chicago International Stock Show last December and this will be his first "film-for-real" for magazine advertising and film will also be sent to New York for possible television advertizing. Carlile, who has lived in Canyon for 13 years, is an auctioneer of quarterhorses and is in the cattle business. He is a partner in the Washita Cattle Company, with headquarters in Canadian and Amarillo. He and his wife, June, have four children.

CCC Ladies Play Tourney

Members of the Canyon Country Club Ladies Golf Association participated in a Ladies Day Tourney Tesuday with two winners in each of three flights.

Winning the championship flight was Mrs. Chuck Allen with a 38 for low gross. Low net went to Mrs. Ray Carnahan who came in with a 43 minus a 15 handicap to give her a net of 28.

Low gross for the nine hole flight was won by Mrs. James Lawson with a score of 56. Mrs. Truett Hull held second place with a score of 61 with a 29 handicap to show a net score of 32.

Beginning golfers 3 hold flight low gross went to Mrs. Johnny McBroom who held a score of 80. Second place holder was Mrs. Hershel Dyson with a low net 81 with a 51 handicap to show a 30 for net score.

Fifteen women played in the tourney. They were Mrs. Bill Harp, Mrs. Guy Bufkin, Mrs. Duane Howard, Mrs. Chuck Allen, Mrs. Truett Hull, Mrs. Phil Swatzell, Mrs. Johnny McBroom, Mrs. Hershel Dyson, Mrs. Bruce Winn, Mrs. Ray Carnahan, Mrs. Huelyn Laycock, Mrs. James Lawson, Mrs. Jack Swatzell, Mrs. Steve Self, and Mrs. Whitey Voelm.

Had a party? Or giving one? Tell The Canyon News about it. Telephone 655-2141, or stop by the News office on the west side of the square.

Stamps Buy 69' Pick Up

It's possible to purchase most anything with trading stamps these days. . .

The High Plains Children's Home proved this Monday when they picked up a 1969 Ford pickup purchased with Gold Bond stamps.

Roy Forehand, house parent at the home, said 1,276 books of stamps were collected to purchase the pickup.

The area Churches of Christ, Forehand said, had been sending stamps to the home since November so the children's home could have a new pickup.

Forehand said they sent the stamps to the main office about two weeks ago and received the pickup Monday.

FIGHT BACK
SHAMROCK
NITROMITE

Fight the price/cost squeeze on your wheat with NITROMITE, Shamrock's fine brand of anhydrous ammonia. A preplant application of NITROMITE speeds early growth, producing lush, high-quality forage (and plenty of it!)—an important factor if you plan to graze cattle this winter.
And the cash crop? NITROMITE delivers the most usable nitrogen per dollar to help increase yields without increasing cost appreciably. So come harvest, even if prices are low, you make out. If they're good, you'll be the big winner.
Put down NITROMITE now. It'll give you a fighting chance in the marketplace.

Floyd Kiser, treasurer of the Schooner Club, presents a check for $25 to Woody Pond for the Girlstown, U. S. A. school bus fund. The fund was started in December and Girlstown now has the bus in operation. Pond said $900 was needed to complete the $3,000 payment on the bus. Donations may be sent to Pond or either of the Canyon banks.

Underwood To Libya

Dr. James R. Underwood, Jr., associate professor of geology at West Texas State University, has accepted a teaching position at the University of Libya in Tripoli.

Dr. Underwood and his family plan to leave Canyon Aug. 28. He is due at the university Sept. 15.

He will be on a two-year leave from WTSU and plans to return here at the end of that time.

Mrs. Underwood said they planned to travel in Europe before arriving in Libya.

The Underwoods have been in Canyon for two years. He formerly taught at the University of Florida and at the University of Bagdad in Bagdad Iraq.

Mr. and Mrs. Tommy Sanford have returned to Fort Bragg, North Carolina following a 15-day leave here where they visited with their parents, Mr. and Mrs. Wayne Sanford, Canyon, and Mr. and Mrs. Ray Gerber, Umbarger.

Former Resident's Rites Held

Funeral services for Douglas J. Walker, 42, were conducted July 26 at the First Baptist Church in Davis, Oklahoma.

He died July 21 and was born May 6, 1927 at Hereford where he attended high school before graduating from Canyon High School in 1944. He was a veteran of both World War II and the Korean conflict and a graduate of the University of Texas at Austin, where he was a lifemember of the Texas Ex-Student Association.

He had been a resident of Davis, Oklahoma for 16 1/2 years, where he was an insurance agent and real estate broker. He was a member of the First Methodist Church at Hereford.

Survivors include his wife, Betty Grace Slover Walker of the home; mother and stepfather, Mr. and Mrs. W. McBrace of Amarillo; and a brother, William DuBois Walker of Panhandle.

CHS School Photos Set

High school portraits will be taken at Britain's Studio beginning Monday with sophomore students.

Sophomore pictures will be made through Friday. Pictures for junior class members will be made August 11-16.

According to Pat Briatin, local photographer, about 450 sophomores and juniors are slated to be photographed.

Students should have their hair cut, fixed and prepared before the sittings. Boys are required to wear coats, white shirt and ties and girls should wear dress-up dresses (not in solid white). At the sitting students will pay $1.03.

Going somewhere? Or been? The Canyon News wants to know about it--and so do its readers.

Conference On Reading Set At WTSU

The 17th annual conference of the Texas Association for the Improvement of Reading will be held on the campus of West Texas State University Aug. 5 through 7.

The conference is for university and public school teachers from throughout the state.

The conference will begin with registration at 7:30 a.m. Tuesday in the Student Union Building.

A general assembly will be held at 8:45 a.m. in the ballroom of the SUB with Mrs. Maurine Walker of Angelo State University, president of the association, presiding.

Guest speakers for the conference will be Mrs. Peggy Brogan, managing editor of special elementary projects with Holt, Rinehart and Winton, Inc., Publishers and Dr. Bernard R. Belden, director of the Reading Center at Oklahoma State University.

Dr. Belden will speak on "Reading Instruction--Is Teaching Enough," "Instructional Alternatives--Responses to Diagnosis," and "The Heart of the Matter--Understanding."

Mrs. Brogan will speak on "A New Look at the Reading Skills," "Individualizing the Teaching of Reading," and "Figuring Out Our Language."

Each day the group will divide into sectional meetings for primary, intermediate and junior and senior high teachers for special instruction.

The conference will adjourn at 1:30 p.m. Thursday.

Singletons Have Girl

Mr. and Mrs. John W. Singleton, Jr. of Canyon announce the July 23 birth of a daughter, Leslee Sain, who weighed 6 pounds 13 ounces upon arrival at Neblett Memorial Hospital in Canyon.

Paternal grandmother is Mrs. Jeanne Singleton of Texarkana, Texas. Maternal grandparents are Glenn E. Sparkman of Amarillo and Dorothy Gillham of Canyon.

The infant's father is employed with the United States Post Office in Canyon and is a candidate for the Bachelor of Science degree at West Texas State University in August.

Church Sets Sunday Bazaar

The Holy Name Church of Happy will sponsor their annual bazaar Sunday in the parish hall, according to Marcella Shaw.

The bazaar will begin with a dinner from 11:30 a.m. to 2 p.m. The dinner will cost $1.50 for adults, 75 cents for children ages 6 to 12, and children under 6 free.

Other events will be a country store, a fish pond, a concession stand and games.

The dinner menu will consist of ham and sausage, parsleyed potatoes, green beans, tossed salad, relish plate, home-made bread, cake, and iced tea.

Crusade To Begin On Monday

High Plains Baptist Assembly is sponsoring a crusade at the assembly grounds, northwest of Canyon, beginning with a free barbecue at 5:30 Monday evening.

The crusade will feature Angel Martinez, evangelist, in services Monday through Thursday night at 8 o'clock each evening.

Preceding the service each day will be the crusade choir rehearsals at 7:15 p.m. and Bible Study hour at 7:15. Steve Taylor will be in charge of choir rehearsal and Dr. Kyle Yates will direct the Bible Study.

Both Calvary Baptist Church and First baptist Church of Canyon will be participating and nurseries will be available at both churches during the week's crusade. All residents are invited.

New Manager Named For Texas TG&Y

L. H. Myers of Dallas is the new manager of the 122 TG&Y stores in Texas, according to Johnny King, manager of the Canyon store.

Myers replaced D. S. Kelly, formerly of Amarillo, who has now moved to Baton Rouge, La.

Myers has been with TG&Y for 24 years and managed his first store in West Texas.

4-H Dress Revue Winners To District Judging

Three Randall County 4-H Girls will be in competition Friday at the District I 4-H Dress Revue at Holiday Inn West in Amarillo.

The district revue will be open to the public at 2:30 p.m. District dress revue winners in the top fourth of the senior division will be eligible to participate in the state dress revue to be held at Dallas in October as a segment of the Texas State Fair. Junior (9-13) county winners will not compete beyond the district event. Senior entries must be at least 14 years of age, with a minimum of three years experience in 4-H.

Miss Linda Hales, daughter of Mr. and Mrs. Jones Hales, will compete in the senior division. She will model a dress and jacket costume of orlon acrylic bonded flannel in a sky blue color. The sleeveless, collarless dress is complemented with a plaid jacket of blue and brown with v-neckline, long sleeves and accenting gold buttons. She is a seventh year clothing participant and member of the Randell 4-H Club.

Representing Randall County in the junior divisions will be Terry Reynolds (12-14 year section) and Becky Williams (9-11 year division).

Miss Reynolds, daughter of Mr. and Mrs. Earl Reynolds, is a fifth year sewing student from Cleta 4-H Club. Her costume is a navy blue cotton and polyester dress with waist lowered to a flared skirt and long sleeves accented with white cuffs and white spread collar. She achieves the Americana effect with a red Grecian tie.

The daughter of Mr. and Mrs. Glenn Williams, Becky is a second year sewing participant and member of the Wagon Wheel 4-H Club. She will model an ensemble of art-deco cotton print made in an A-line dress with round collar, front zipper and walking pleat.

Sun
Heritage
Woman's
Club

Members of the Heritage Women's Club ready the old West Texas State Bank Building for their flea circus and bake sale this weekend. Members are (l to r) Darlene Hollabaugh, Kay Chester, Johnnie Gordon, Karen Stephens, and Janis Lambert.

Flea Market And Bakery For Weekend

All types of household items will be sold Friday, Saturday and Sunday during the "flea market" sponsored by the Heritage Women's Club.

The sale will be held at the old West Texas State Bank lobby on the square beginning at 8 a.m. Friday and Saturday and from 2 to 5 p.m. Sunday.

The club will also sponsor a bake sale. Donations may be made for the sale by calling 655-7307 or 655-2251.

The funds from the sale will go toward the purchase of an isolette for premature babies at Neblett Memorial Hospital.

Members of the committee planning the project are Darlene Hollabaugh, Kay Chester, Johnnie Gordon, Karen Stephens, Janis Lambert, Virginia Cotton, Ginger Courtney and Jeanette Perry.

Japanese Girl Visits Canyon

Yasuko Kuwahara, an exchange student from Osaka, Japan, was in Canyon over the weekend visiting with Mr. and Mrs. Calvin Davis.

Miss Kuwahara is staying with the Roy Jones and Conrad Ryan families from Abernathy while she is in the United States.

She attended the performance of "TEXAS" while in Canyon and won the triangle for being the person who traveled the furtherest distance to the play.

She will be in Abernathy for five weeks.

Sorority Chapter Meet

Chi Upsilon chapter of Beta Sigma Phi yearbook committee met Sunday in the home of Mrs. Bob Costley to make plans for the chapter's yearbooks for the coming year.

The committee will meet Thursday at 7:30 p.m. to begin making covers and index tabs. The meeting will be at the Bob Costley home. Other committee members, aside from Mrs. Costley, chairman, are Mrs. Speck Benham, Mrs. Roy Reynolds, Mrs. Lester Crow, Mrs. Carl Sims and Mrs. Calvin Costley.

Following the committee meeting Sunday, other chapter members met at the Costley home at 4:30 that afternoon to make decorations for the Tiny Tot Fashion Show to be held August 2.

The meetings were concluded with a hamburger cookout

Members and their husbands present Sunday were Mr. and Mrs. Speck Benham, Mr. and Mrs. Jerry Costley, Mr. and Mrs. Lewel Johnston, Mr. and Mrs. Lester Crow, Mr. and Mrs. Calvin Costley, Mr. and Mrs. Roy Reynolds, Mr. and Mrs. Carl Sims and the Bob Costleys.

Bridal Event Held Friday For Warrens

Mrs. Randy Warren, nee Diana Williams, was honored with a miscellaneous bridal shower Friday evening in the home of Mrs. Charles Smallwood.

Guests were received by Mrs. Smallwood, the honoree Mrs. Warren, Mrs. Jack Williams, mother of the bride, and Mrs. A. M. Warren, mother of the bridegroom.

Miss Penny Warren was at the bride's book.

Laid with a white shadow embroidery cloth, the tea table had silver table appointments and was centered with a bouquet of pink daisies, ivy and baby's breath in an antique coffee urn. Flanking the arrangement were pink candles and the base of the silver punchbowl was accented with an arrangement of ivy and baby's breath following the bride's chosen colors of pink, white and green.

Serving at the tea table was Shirley O'Donald.

Hostesses for the occasion were Mesdames Roy Lyles, M. L. Sherrod, Otis Burk, Bill Anderson, W. J. Wooten, Orville Hicks, Harold Prichard, Raymond Raillard, Troy Martin, Weldon Hager, Crosby Hammons, Cristler Crain, Francis Shell, Nolon Henson, Bryan McDonald, and Mrs. Smallwood.

C. Wrights Have Girl

Mr. and Mrs. Carroll Wright of San Angelo announce the July 26 adoption of a daughter, Leslie Ann.

The infant weighed 7 pounds 9 ounces at birth and was the first grandchild for Mr. and Mrs. Milton Morris of Canyon. Paternal grandparents are Mr. and Mrs. Leonard Wright of Eola.

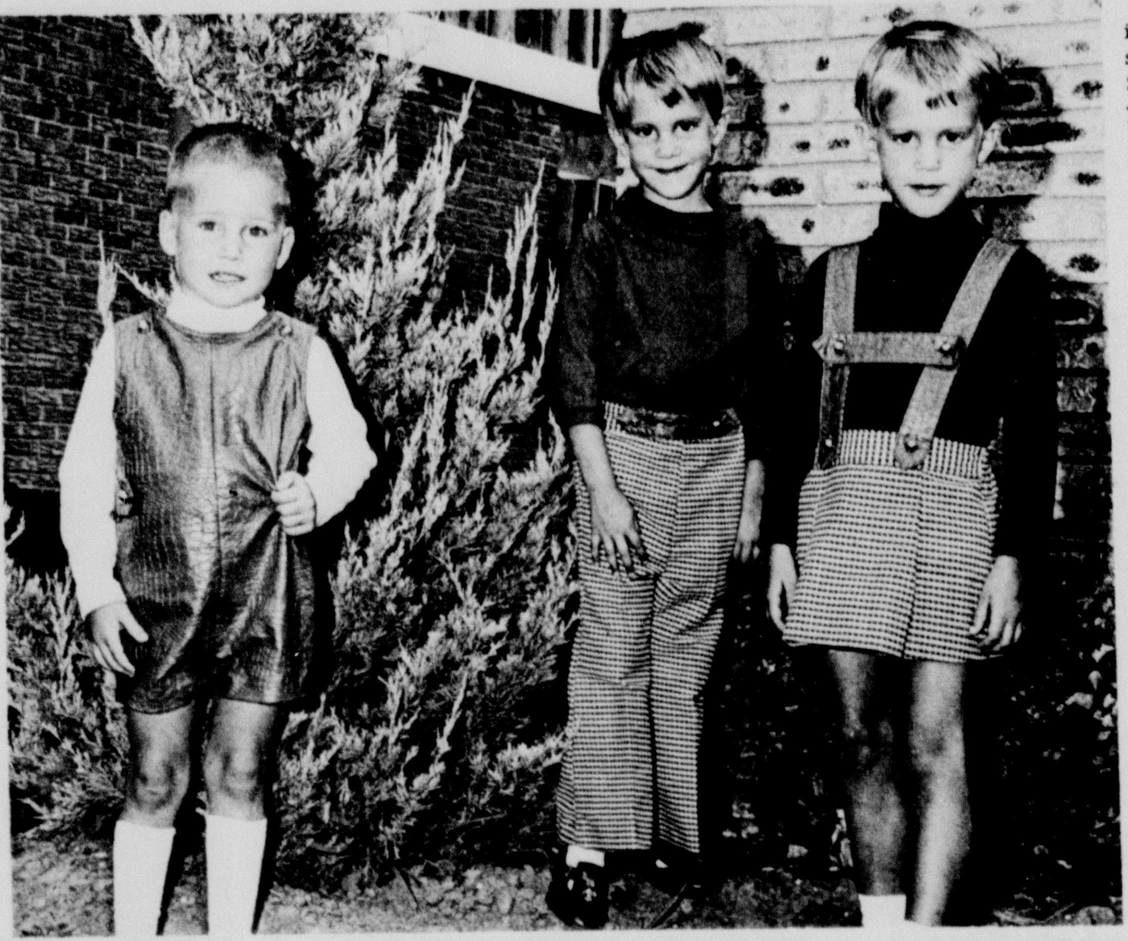
Fashions And Salads Sponsored By Sorority



FASHIONWISE ready for the Beta Sigma Phi style show Saturday are, from left, Wade Elliott, Jana and Karla Podzemny. Wade, the son of Mr. and Mrs. Stan Elliott, wears a short-all suit of synthetic red leather with a white turtleneck shirt. Matching red leather is carried on the suspenders of the navy-white checked skirt and belt front of the navy-white flared pants worn by the twin sisters. Accenting their ensembles are turtle neck blouses. The twin girls are daughters of Mr. and Mrs. Eugene Podzemny of Rt. 2, Canyon.

Tiny Tot Shoppe of Amarillo is furnishing fashions for a preschool fashion revue to be held Saturday at 11 o'clock in Canyon High School auditorium.

Sponsored by Chi Upsilon chapter of Beta Sigma Phi sorority, the revue will be concluded with a salad luncheon in the school cafeteria. Tickets for both the revue and luncheon are $1.25 for adults and 50 cents for children.

Helen Holman of the Tiny Tot Shoppe will narrate the revue of fashions.

Modeling from Canyon will be Leah Bauer, Lanny Wilkerson, Leslie Wilkerson, April McRoberts, Wade Elliott, Karla Podzemny, Jana Podzemny, Jay Clifton, Cortney Stephens, Misti Clark, Stefan Turk, Angela Levens, Scott Robinson, Mathew Davis, Stephanie Lee Raymond, Markaye Henderson, Kristi Marshall, Lynda Rhea Brotherton, Angela Winters, Greg Winters and Abbejane White.

Revue models from Happy are Jerry Sims, Mandy Shipman, Kevin Odom, Kyle Odom, Angie Henry, Danny Venhaus, and Donny Venhaus.

Other area models will be Donny Price and Trudy Price, both of Fritch; Janet Yarbrough of Panhandle; Lori Triplett of Claude; Kelly Foster and Kim Foster of Wayside; and Chris Hightower and Ewen Willis of Amarillo.

Door prizes will be given during the revue.

Martha Whiteaker

Marriage Planned

Mr. and Mrs. R. E. Whiteaker of Dalhart announce the engagement and approaching marriage of their daughter, Martha, to Phillip Lee Parker, son of Mr. and Mrs. J. O. Parker of Canyon.

Wedding vows will be exchanged at the First Baptist Church in Dalhart September 27.

A graduate of Dalhart High School, the bride-elect is a sophomore elementary teaching major at Texas Technological College in Lubbock.

Her fiance, a graduate of Canyon High School, is a junior at West Texas State University this fall and a member of Sigma Alpha Epsilon.

Mrs. Charlie Chandler of Hobbs, New Mexico and her daughter, Nellie B. of Fort Sumner visited with longtime friend, C. E. Beasley, recently and attended the outdoor drama "TEXAS" in Palo Duro Canyon State Park.

LaGrone
Funeral Chapel
1702 5th AVE CANYON

Dear friends,

If you will think of recent funerals you have attended, we believe you will discover that each one left with you a memory picture.

The flowers, the music, the message of the minister, the general arrangements - all these are a part of that picture.

It is our task - as we see it - to make that picture just as beautiful and satisfying as it possibly can be made.

Respectfully,

Jerry N LaGrone

Candlelight Ceremonies Read For Miss Stephens-Price

Mrs. Randall Kieth Price

Vigo Park Baptist Church was the site for the double ring marriage ceremony Friday evening uniting Miss Mary Ann Stephens and Randall Keith Price in marriage.

The bride is the daughter of Mr. and Mrs. W. A. Stephens of Vigo Route, Tulia. Parents of the bridegroom are Mr. and Mrs. H. J. (Buddy) Price of Canyon.

Rev. Carl H. Hogue officiated at the vow exchange. Miss Alicia Boone of Canyon sang "One Hand, One Heart," "You'll Never Walk Alone" and "The Lord's Prayer". She was accompanied at the piano by Mrs. Carl H. Hogue of Vigo Park.

The candlelight ceremony was highlighted by a greenery covered golden archway from which hung two white flocked wedding bells. A satin pillow was placed just under the bells for kneeling and single candles in gold and white candleholders decorated with white satin bows and lily-of-the-valley were placed on top of the archway columns. Large baskets of white gladioli and greenery were inside each column and two candelabra, trimmed with white satin bows, flanked the archway on either side. Following the ceremony, the two single candles from the archway were lifted by the bride and bridegroom and used to light a single memory candle which was placed on a small table in front of the couple as they were kneeling.

Just after the ceremony, the bride paused and presented the bridegroom's mother and grandmother (Mrs. Joe Currie) with long stemmed carnations set on a ruffle of tulle with lime green ribbon streamers. The bridegroom in turn presented the bride's mother with a similar flower as the couple descended the wedding aisle.

Given in marriage by her father, the bride wore a formal wedding gown of peau de soie with a fitted bodice and three gore side gathered skirt. Over the sleeveless gown, she wore a white lace jacket with scalloped long sleeves and scalloped edging at the bottom. The detachable train was gathered onto a lace trimmed belt. Her fingertip veil of English illusion was held to a crown of seed pearls. Her only jewelry was a small cross pendant set with a marquise diamond, a gift from the bridegroom. The necklace was her "something new", for "something blue" she wore the traditional blue garter and for "something old and borrowed" she had a handmade green handkerchief with lace which was the bridegroom's great-grandmother's. The bride wore a penny in her shoe that had the Lord's prayer imprinted on it and she carried a colonial bouquet of feathered white carnations complemented with seed pearl hearts, satin ribbon and white tulle ruffling atop a white Bible, which was a gift from the bridegroom.

Miss Patti Stephens, sister of the bride from Vigo Park, was maid of honor. She wore a streetlength white lace over green satin dress which was A-line styled with short sleeves. Her headpiece was a white lace trimmed organza bow. She carried a single long stemmed white carnation on a white tulle ruffle enhanced with lime green satin bows, lace and streamers.

Tommy Stephens and Sheila Stephens, nephew and niece of the bride from Plainview, were the candlelighters. Miss Stephens was attired in a dress styled similar to that of the maid of honor. She had wristlettes of green satin ribbon and feathered carnations with white shortie gloves and white shoes.

Fred Richard of Canyon was best man. Mike Stephens, nephew of the bride from Plainview, Mark Landrum and Kent Barnard, both of Canyon, were the ushers for the occasion.

For her daughter's wedding, the mother of the bride wore a blue shantung dress with lace overjacket. Her accessories were white with a corsage of white feathered carnations accented with lace and pearl hearts. The bridegroom's mother was dressed in a pink long-sleeved Italian lace dress with pink accessories and corsage of white carnations with lace ribbons and pearl hearts.

Fellowship Hall of the church was the site for the wedding reception where the table was laid with a lace over green tablecloth. The three tiered wedding cake had roses of pale yellow topped with wedding bells on the top tier. Individual cakes with pale yellow roses, matching the wedding cake, were served along with green punch, nuts and mints. Table appointments were crystal and two candles were arranged on either side of the bride's bouquet to decorate the table. Serving were Miss Fawneil Price, sister of the bridegroom from Canyon, and Miss Fay Modisett of Wayside.

The rice girl was Miss Marsha Currie, cousin of the bridegroom. She carried a small white basket decorated with white tulle and green ribbons and filled with white net trimmed with green ribbons, filled with rice. She wore a wristlet of green satin ribbon and feathered carnations.

For a wedding trip to Colorado and New Mexico, the bride changed to an orange sleeveless sheath with rolled collar and an orange and yellow plaid coat with long sleeves and pockets. She wore a corsage of carnations from the bridal bouquet and had orange accessories.

Preceding the marriage ceremony, the rehearsal supper was given by the bridegroom's parents at Omer's Restaurant Thursday night. Centerpiece for the head table was of pale yellow and green assorted flowers flanked by green candles. Side-tables had matching green candles and namecards were printed in green ink with lace edging for female members of the wedding party. Twenty-two were served.

The bride was honored with several parties prior to the wedding including a miscellaneous bridal shower in the home of Mrs. Keith Jones of Canyon, a miscellaneous bridal shower in the home of Mrs. Roy Dodson at Vigo Park, and a personal shower in the home of Mrs. Willie Modisett at Wayside.

A graduate of Tulia High School, the bride plans to continue her education at West Texas State University this fall.

The bridegroom graduated from Canyon High School. He is a student majoring in computer programming and mathematics at West Texas State University, where he was a member of Mary E. Hudspeth National Honor Society last year.

Miss Shirley Platt Is Honoree

A miscellaneous bridal shower honoring Miss Shirley Ann Platt, bride-elect of Ewing Lee Clayton, was held Wednesday evening in the home of Mrs. Bob Bellah.

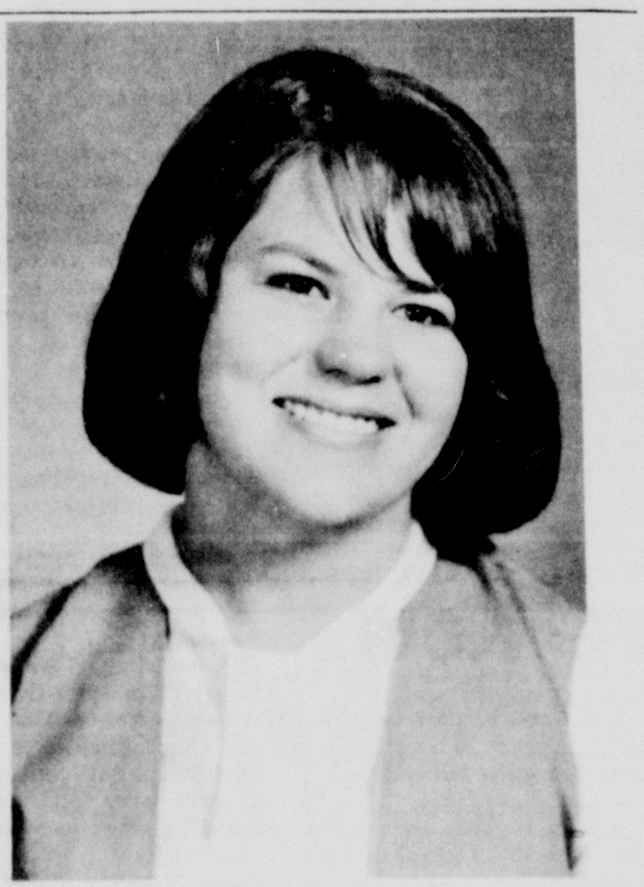
Receiving guests were Mrs. Bellah, Miss Platt, Mrs. Nettie Platt, mother of the bride, and Mrs. Clayton of Dumas, mother of the bridegroom.

The couple is slated to marry August 23 in Canyon.

At the bride's book was Kathy Platt, sister of the bride-elect.

The tea table, laid with an embossed net cloth with scalloped border of satin, was centered with a bouquet of daisies flanked by yellow candles. Crystal appointments were used for the occasion. Serving at the table was Miss Lee Hicks.

Co-hostesses with Mrs. Bellah were Mesdames Noble Brown, Hatcher Brown, Kenneth Erwin, Jack Jennings, Bill Hicks, B. L. Hufnagle, Ronald Hicks, James Risner, Bob Anderson, H. W. Burrus, Jerrel Corbett, Cecil O'Donald, R. W. Thompson, R. B. Richardson, Edgar Robinson, Bob Childers, Terry Martin, Doug Loudder, Roland Johnson, Donnie Rogers and Miss Joyce Nitengale.



Miss Debbie Gordon

August 23 Vows Set

Mr. and Mrs. Lloyd Gordon of Wildorado announce the engagement and approaching marriage of their daughter, Debbie, to James Odell Perry of Lubbock.

The couple is to be married Aug. 23 at the Southside Baptist Church.

Miss Gordon is a student at Canyon High School and was a member of the choir.

The prospective bridegroom is the son of Mr. and Mrs. James Orville Perry of Lubbock. He attended school in Lubbock and is now employed with Maywood Industries in Amarillo.

rector.

The awards were in concert, sightreading and marching.

Last year, the band had 14 students to be named to the All-Region band which was more than any other Class AAA school in Texas, Milligan said.

Two students represented the Canyon band in the All-State Festival last year.

In solo and ensemble competition, Milligan said, about 70 of the band members received first place medals.

The drum major for the band next year is Rick Wester. Twirlers will be Marsell Earhart, Gail Thompson and Andrea Shepic.

Georgetown.

"I will just lack five months having lived in Canyon 60 years," Dr. Hill said this week.

"I want everyone to know it tears us up by the roots to leave here.

"People have been so good to me and helped me to have whatever success I've had. . . not only the people of Randall County but of the Panhandle. They have been inspirational to us.

"I don't want the people of the Panhandle and Canyon to think we don't like it here. We love it."

Dr. Hill said he hopes area people will drop by and visit with him and Mrs. Hill at their new home.

Smith. . . .

Aug. 11 as they begin a Panhandle tour from the West Texas State University Farm here.

Chamber Manager Roland Black suggested that a Texas flag be placed at "TEXAS" headquarters on Fourth Avenue. Black also suggested prominent display of some 100 Texas flags during the outdoor drama season beginning next year.

Lutherans Have Guest

Rev. Larry W. Neeb will speak at St. Paul Lutheran Church in Canyon at the 11 a.m. worship hour Sunday.

His topic will be "The Best Is Yet To Come" based on Romans 15. The public is invited.

Rev. Neeb is public relations director for Concordia Theological Seminary in St. Louis, Missouri.

Daughter's Birth Told

Mr. and Mrs. Brian L. Walton announce the birth of a daughter at Northwest Texas Hospital in Amarillo.

The infant, born July 22, weighed 7 pounds, 7 ounces at birth and was named Renee Elise.

Grandparents are Mr. and Mrs. Rudolph E. Wilson of Denver, Colorado and Mr. and Mrs. Joseph L. Walton of Cleveland, Ohio.

The infant's father is an assistant professor of music at West Texas State University.

Students. . .

(Continued from Page 1)

Glendale King, William Boyd Long, George L. Loudder, Oleson Joe Lyng, Everett Roy McGregor, Jo Lynn Martin, Stanley Ray Prichard, Alvareta Griffin Richards, Judith Vernell Russell, Arboth Andrew Rylant, John Wallace Singleton, Jr., Eddie M. Smith, Martin Hugh Waldrop, David Clyde Vaughn, Jerry Don Whitaker, Diana Lynn Williams and Melvin Glen Woolley.

Seeking bachelor of business administration degrees are Ray Edward Grimes, Wister Ray Harrison, James Richard Hill and Johnny Eugene Philan.

Jeanne Weldon Denton, Kenneth Aubrey Crossland and Diana Lynn Williams are also members of Alpha Chi national honor society.

Alpha Chi consists of junior and senior students who have maintained at least a 2.0 grade point average.

William Boyd Long and Stanley Ray Prichard are both distinguished military graduates.

Court. . . .

(Continued from Page 1)

by David West of Canyon First National Bank that he be allowed to re-vamp the bank's county tax rendition.

He said he rendered the bank's capital structure at 100 percent instead of at approximately 80 percent as it was rendered last year.

West argued that banks are at a disadvantage because they are required by law to publish their financial structure periodically while other merchants are not. He said that because of this some leniency should be shown them.

Mrs. Audrey Bruse, county tax assessor-collector, said that according to Texas statutes the rendition had been made correctly.

She told the court the other two banks in the county had been rendered in the same manner as Canyon First National.

Canyon Independent School District has assessed the bank on a 100 percent basis.

Sitting as a board of tax equalization the court voted to tax pipelines on the basis of 17 percent of 100 percent valuation.

Earlier this month representatives of seven pipeline companies had sought to be taxed on the basis of 25 percent of lifetime value.

Commissioners took no action on a budget request for 1970 by E. L. Booch, 47th District Court probation officer.

Booch requested $15,838.17 for the coming fiscal year representing an increase of $398.17 over the current year.

Total budget being requested is $70,706.10 with Potter County being asked to pay 76.3 percent or $53,948.75 and Armstrong 1.3 percent, or $919.18. Randall's share has been set at 22.4 percent.

Mr. and Mrs. Irby Carruth of Austin are spending the week visiting friends and relatives in Canyon. Carruth returned to Austin Monday and Mrs. Carruth will remain in Canyon to prepare to move to Austin.

Vote Absentee

Mrs. Alicia Abney of Canyon was one of the Canyon residents to vote absentee this week for the Tuesday constitutional amendment election. Friday is the last day to vote absentee.

Pickles-Relishes Add Spice To Family Meals

Adding spice to meals and snacks may be accomplished with pickle products and relishes prepared during the summer months when fresh vegetables are plentiful.

The skillful blending of spices, sugar and vinegar with fruits and vegetables gives crisp, firm texture and pungent, sweet-sour flavor.

Pickles and relishes also contribute some nutritive value to the diet and contain little or no fat with the exception of the sweet types.

Although food markets today offer a wide variety of pickles and relishes, many homemakers like to make their own tasty pickle products when garden vegetables and fresh fruits are in abundant supply.

Following are a collection of pickle and relish recipes. More recipes for pickling are available through your county home demonstration agent's office. Contact Mrs. Becky Hall, agent, for informative booklets and other recipes to try.

B & B RELISH

Chop dishpan about 2/3 full of firm green ripe tomatoes. Finish filling pan with chopped onions and green hot peppers.

Mix. Pour about 1/2 gallon vinegar over all. Add 4 cups sugar, about 1 cup salt and some black pepper.

Stir and boil for five minutes. Can in jars and seal.

* * *

PICKLED OKRA

1 quart vinegar
1/2 cup water
1/2 cup salt

Bring to boil and pour over washed raw okra.

Place one clove garlic, one hot pepper and one teaspoon dill seed in each pint jar.

Add okra to jar and finish filling with juice. Makes six pints. Allow to set two months before serving.

* * *

BREAD & BUTTER PICKLES

4 quarts sliced cucumbers
6 white onions, sliced
1 green pepper, sliced
1 red pepper, sliced
3 cloves garlic
1/2 cup salt
3 cups vinegar
5 cups sugar
1 1/2 tsp. tumeric
1 1/2 tsp. celery seed
2 tsp. mustard seed

Alternate salt and cucumber slices in large pan. Dump a tray of ice to cool for each four quarts of cucumbers. Stir. Let stand three hours. Drain and rinse cucumbers well.

Combine vinegar, spices, onion and cucumbers. Bring just to boil. Put in jars and seal. Allow to set for about six weeks for best pickle.

* * *

SWEET PICKLES

7 lbs. cucumbers, sliced thin
2 cups white powdered lime
2 gallons water.

Combine and let soak for 24 hours. Rinse very well. Cover cucumbers with fresh water and soak for at least 3 hours. Drain. Make syrup and let cucumbers set overnight in syrup.

2 quarts vinegar
4 1/2 lbs. sugar
1 Tbsp. salt
1 tsp. celery seed
1 tsp. whole cloves
1 tsp. mixed pickling spice.

Bring cucumber slices to boil in syrup. Boil about 40 minutes. Place in sterile fruit jars and seal.

* * *

FRESH PACK DILL PICKLES

17-18 pounds cucumbers (3-5 inches in length)
3/4 cup granulated salt, water

Make brine of salt and water to cover cucumbers which have been washed thoroughly and scrubbed with vegetable brush. Cover with the five percent brine (3/4 cup salt per gallon of water). Let set overnight, drain.

6 cups vinegar
3/4 cup salt
1/4 cup sugar
9 cups water
2 Tbsp. mixed pickling spices
2 tsp. whole mustard seed, per jar
1-2 cloves garlic, per jar.
3 heads dill plant, fresh or dried, per jar or else 1 Tbsp. dill seed per jar.

Combine vinegar, salt, sugar, water and mixed pickling spices that are tied in a clean, thin, white cloth. Heat to boiling.

Pack cucumbers into clean, hot quart jars. Add mustard seed, dill plant or seed and garlic to each jar.

Cover pakced cucumbers with boiling liquid to within 1/2 inch of top of jar. Adjust lids.

Process in boiling water for 20 minutes. (Begin counting processing time as soon as hot jars are placed into the actively boiling water.)

Revmoe jars from boiling water and complete seals if necessary. Set jars upright, several inches apart, on a wire rack to cool.

* * *

PICKLED PEACHES

16 pounds peaches, small or medium sized
3 quarts sugar
2 quarts vinegar
7 (2-inch) pieces stick cinnamon
2 Tbsp. whole cloves

Combine sugar, vinegar, stick cinnamon and cloves. (Cloves may be put in a clean cloth, tied with a string, and removed after cooking if desired.) Bring to a boil and let simmer covered for about 30 minutes.

Wash peaches and remove skins; dipping the fruit in boiling water for one minute, then quickly in cold water will make for easy peel removal. To prevent pared peaches from darkening during preparation, put them into cold water containing two tablespoons each of salt and vinegar per gallon. Drain just before using.

Add the peaches to the boiling syrup, enough for 2-3 quarts at a time, and heat for about 5 minutes.

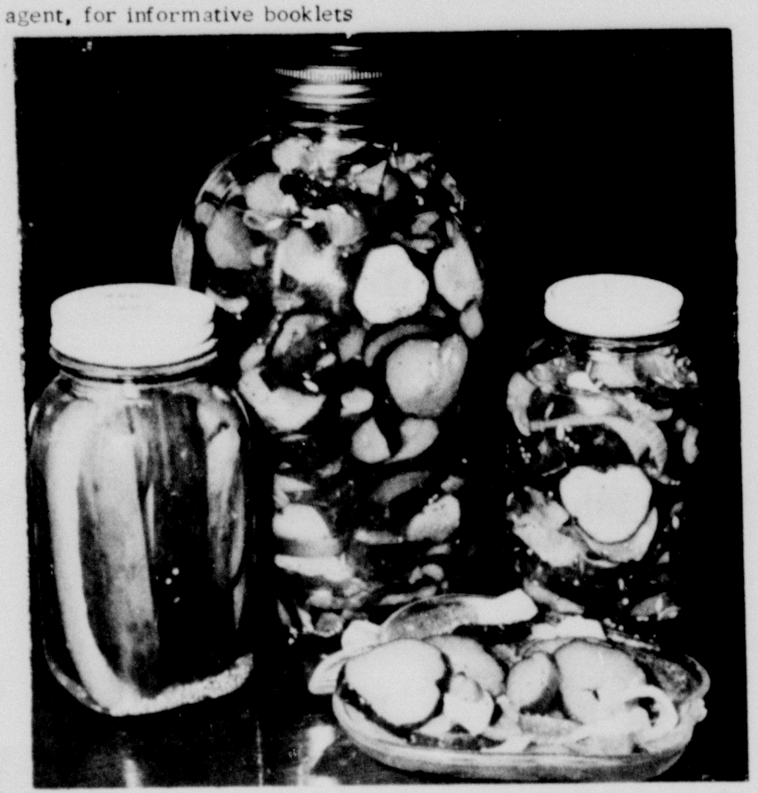
Pack hot peaches into clean, hot jars. Add 1 piece of stick cinnamon and 2-3 whole cloves (if desired) to each jar.

Cover peaches with boiling syrup to within 1/2 inch of top of jar. Adjust jar lids.

Process in boiling water for 20 minutes (begin counting processing time after water in canner returns to boiling). Remove jars and complete seals when necessary. Allow to cool on wire rack.

* * *

Additional recipes for Watermelon Rind Pickles, Corn Relish, Horseradish Relish, Home-Canned Sauerkraut, Dilled Green Beans and other complimentary foods are available from booklets in the HD Agent's office.



PICKLES, relishes and other tasty treats may be preserved in season for later use. Included in this article, which is one of a series, are several recipes for pickles and relishes. Other canning and freezing idea booklets are available in the offices of the Randall County Home Demonstration Agent, Mrs. Becky Hall.

Gene Howe News

BY JOAN FOWLKES

Several Boy Scouts from the Gene Howe area are to be involved in the Kwahadi Indian Summer Ceremonials due to take place at the Boy Scout House at Plains and Bellaire Streets, August 21, 22, and 23.

The boys are Nobie Cates, Mike Lovelady, Duane Harp, and Mike Hillman.

* * *

Mr. and Mrs. Jack Laing from San Francisco, California have been here visiting in the home of Jack's parents, Mr. and Mrs. Glenn H. Laing.

When they left the Amarillo area, they went to Rancho Encantado, a vacation spot near Sante Fe, New Mexico to finish their vacation at the resort area before heading back home.

Jack is a sales engineer for an engineering firm in San Francisco.

* * *

A recent guest in the home of Mr. and Mrs. Charles Fowlkes, Sandy, Brad, and Bo was a nephew of Mrs. Fowlkes, Boyd Gatfield, from Boise, Idaho.

Boyd rode to Amarillo from Boise on a motorcycle. He left for the return trip home Tuesday.

* * *

Benjamin L. Blair has accepted a coaching assignment at the San Jon High School at San Jon, New Mexico, after he graduates from West Texas State University in August.

The Blairs have three children in the Gene Howe School and two pre-schoolers.

* * *

Mr. and Mrs. Guy Bufkin, Tracey and Todd have returned from a trip to Dallas to visit Six Flags Over Texas and then on to Kemp, Texas to visit with Guy's parents, Mr. and Mrs. Jim Bufkin, and other relatives.

Before returning home from the two-week trip, they went on to Mexia, Texas where they attended a family reunion of Mrs. Bufkin's relatives. Approximately seventy members of the Carroll family attended the affair.

* * *

Mr. and Mrs. Charles Holcomb spent several days at the Mossiman's Guest Ranch, northwest of Las Vegas, New Mexico the first part of July.

* * *

Members of the Hollywood Baptist Church held a picnic at the Thompson Park in Amarillo last Saturday with about thirty-five persons attending.

Everyone brought their own picnic lunches to the summertime outing and fellowship.

* * *

A baby boy was born to Mr. and Mrs. Ron Lickey a 11:47 a.m. June 3.

The son, Ronald Jay Lickey, Jr. weighed 8 pounds and 4 ounces and was 21 inches long at birth at Northwest Texas Hospital in Amarillo.

Paternal grandparents are Mr. and Mrs. Jay Lickey of Pampa and maternal grandparents are Mr. and Mrs. Charles Holcomb of Amarillo.

Mrs. Lickey, the former Cindy Holcomb, attended Canyon schools and both she and Lickey attended West Texas State University last year.

* * *

Diane and Dena Harp returned home after spending a little over a week in Dallas visiting in the home of Mrs. Harp's sister and her family, Mr. and Mrs. V. A. Shelton, Cindy, Terri, and Tracy.

* * *

Back after a trip to Austin are Mr. and Mrs. Harold Lovelady, Patty, and Mike.

They visited with Mrs. Lovelady's brother and family, Mr. and Mrs. Clain Carden, Marla, Paula, and Laura.

* * *

The C. W. Hefley family has returned home after Mr. and Mrs. Hefley spent time in Dallas and Jodi and Alexis were in Longview visiting with Hefley's aunt and uncle and their children, Mr. and Mrs. Rene Collins, Sally, Jimmy, and Phyllis.

While the Hefleys were in Dallas, Mrs. Hefley attended a Products School, sponsored by the Southland Life Insurance Company of that city and Hefley worked with a friend, Rusty Martin, who is the owner of a ceramic tile company there. In the evenings, they visited with other friends in the area.

Grudge Game

A "grudge" softball game tonight, Thursday, will pit the Kiwanis and Lions club teams against each other at Little League Park.

Beginning at 8 p.m., the game will be played according to regulation slow-pitch rules and is open to the public at no charge.

Five Home From Germany To Americanize

BY LORENA MILLER

The first time back in Texas after 4 years in Germany is a pleasant change for Mr. and Mrs. Gerald Woodward and children, Carolyn, Sheri and James.

The Woodwards are visiting this week with her mother, Mrs. Gladys Haines, and plan to go to San Antonio about August 5 for a visit with his mother, Mrs. Claire B. Woodward. They will take a return flight to Germany from New York City in late August.

The family lives in Wurzburg, Germany on the Main River in the political state of Bavaria. He is life insurance agent-representative for Capitol Life of Denver and when they return he will be with a cooperative group, Travellers Insurance.

Although he has been in Germany for 4 1/2 years, his wife and children have been there for four years in May.

"The main things are the same being a housewife," related Mrs. Woodward explaining that the differences encountered are in the markets where cuts of meat are different and the meat is not aged, thus giving a different flavor.

"We have learned to love pork and veal and as yet I have not had an opportunity to compare German and American prices. The German pound has 50 more grams than the American pound of 450 grams and meats are priced by the 100 grams in Germany. Packaging is different and they have open markets where they sell vegetables and produce from stalls year round.

"In the spring, summer and fall the farmer's wives bring their wicker baskets of fresh produce and set up a selling table. They do not sell meats in the open market.

"Generally, Germans do not eat corn-- it is fed to the pigs-- but the younger generation of Germans are learning now to eat corn from American example.

"Blackeyed peas, okra and squash have been a treat back here in Texas as they do not have them in Germany," she related, explaining that squash in Germany is a much larger variety and is bought by the housewife in a slice which she takes home and prepares by baking.

"In Germany, they don't have broccoli. They have something similar, but it is not the same," she stated.

Adding to the discussion of foods, Mr. Woodward commented that "asparagus is a specialty and is grown in sandy soil in 12-18 inch mounds--so that when the stalk is ready to cut it just barely breaks the crust of the bound. They have special knives (like a dandelion digger) which they insert in the mound to extract the asparagus. The asparagus has a bleached effect due to having no sunlight during its growing period.

"Asparagus harvest is regulated by a seasonal law. It can only be picked during a certain season--and while it is plentiful some hotels had asparagus specialties fixed in numbers of ways. One hotel in Wurzburg had asparagus fixed in 69 different ways.

Mrs. Woodward said that some housewives cook the asparagus, pour vinegar and oil over it, and serve it as a salad.

"There is a generous quantity while it is in season but it is high--75 cents per pound. In America when there is an abundant supply the prices drop, not so in Germany. Of course you could buy from a farmer cheaper.

Mrs. Woodward brought to Texas with her a torte pan used for the favorite German dessert of fruit torte. The pan, with fluted edge, is used to bake a spongelike cake and the top is filled with fruit and covered with a sweet glaze, topped with whipped cream and served with lots of expresso coffee.

Speaking of coffee, she added that in Germany the custom is for coffee hours to come on Sunday afternoon from 3:30 to 6 o'clock.

"They always entertain with all persons seated at a table and open with a glass of wine, about three kinds of cake, whipped cream and strong expresso coffee. Then after serving and visiting are concluded they stop for a second glass of wine and a series of crackers, nuts, and sandwiches to take away the sweet taste.

"At 6 o'clock sharp you rise to leave, unless they really insist that you stay-- that is the custom," she concluded.

And always when you go to coffee you bring the hostess a gift, a book, a specialty or a basket of flowers. Flowers are plentiful in the open markets there.

Speaking on the change of customs, Mr. Woodward explained that "the Germans live by laws. Everyone knows about them--they enforce them too.

"For instance on Sunday morning there is no activity. They don't crank up a lawn mower or wash their car, because the police will make them quit if they are reported.

"I was shocked to hear the lawn mowers crank up here on Sunday morning--and the noise quits at ten o'clock sharp. People just go on to bed at ten o'clock, at least they can't make any further noise according to the law.

"And their automobile laws are stringent," he added. "It is sometimes hard for Americans to understand the changes, but with time you become accustomed to all the laws.

"For instance I got a ticket," he laughed. "At 2 a.m. one morning a patrolman checked the tires on my car and found one with inadequate tread on it. He gave me a ticket allowing three days to replace the tire and have it checked by a patrolman.

"I had the tire changed, but didn't report in and when the time was up the patrolman was back around checking to see why I had not been in to let them check the tire. I wound up with a new tire and a small fine from the incident.

"Their laws make for safety on the streets and highways and you don't see near so many old clunker cars running around. Usually the ones that don't climb the hills are being driven by the Americans.

"It is against the law to let insurance lapse and this is enforced by the police. They will ultimately take away your license if you continue to let your insurance lapse or get behind.

"They have a complete system of registration for cars including insurance which is infallible.

"If you move across the river for instance," he said, "you have to de-register your car and re-register it in the second district. And the registering districts are not even in the same building."

In speaking of the laws of Germany, he also briefly spoke of the government in Germany and said that only a small minority, about 8.9 percent, are members of the purely Communist groups.

"The Communists don't get the support," he said. "They had to change their convention site three times last year before it could be held.

"We haven't noticed any appreciable amount of front organizations. There are probably a few Communist front organizations among the student ranks.

"The government is predominately Socialist Democratic with three active parties and this gives for lively political activity.

"The German people are very aware of their right to vote and they are always out at the polls. All elections are held on Sunday, because that is when the people are not working and have a chance to get to the polls.

"Conrad Adenhauer, who was the first Republic of Germany Chaunceller after the war, had a big role in the school system also," he related explaining that since Adenhauer was Catholic he supported a boom to school buildings for the Catholics.

"Although now the schools are gradually becoming community schools with the integration of both the Catholic and Protestant, there was for many years hard feelings about the schools there."

The Woodwards have three children, Carolyn, 10, Sheri, 8, and James, 7 1/2, who all attend the volkschule (folk school).

"The folk school is a period of 4-5 years and then if they are going on to college they take an examination and go into the gymnasium (which is a preparatory school level) and then on to the university.

"This year they are adding a ninth year to the folk school in Bavaria.

"If they are not going to the university they enter a trade school where they get on-the-job experience and one day of classroom study. This is excellent in that even the salesladies can tell at a glance what size, etc. that is needed for a person--but it is also hard in that they are given such intensive training in the field that it is hard to change to another line of work.

"You go into a store," said Mrs. Woodward "and ask the saleslady for a particular material. Tell her about how you plan to make it and she can tell you how much material to buy without ever seeing the pattern--and they have never been wrong yet.

"There is also a middle school, very similar to the gymnasium, which is a combination between the preparatory and trade school and helps to prepare students for arts, crafts and other similar jobs.

"It is very difficult to find equivalents between the American and German systems of schooling," she commented.

"In German schools," she said, "the students go to school six days per week for 10 1/2 months. They have classes from eight in the morning to about 1:30 in the afternoon and they only get their report cards twice per year.

"Schools are out the third week in July, making for a mass exodus on vacations.

"They are taught the regular things: reading, writing, arithemetic, nature, health and first aid, arts and crafts, history, religion, languages, physical education and are given an emphasis study in history and geography (as it relates to their area and state).

"When the weather permits," she said, "it is not unusual to see a group of children taking tours of the historic buildings in the town."

"They are very thorough and complete in their training of the art and history of their hometown and general area. For instance my children can tell you what is on the other side of every mountain within our immediate area there on the Main River.

"In the schools they also teach the children knitting and embroidery. Both the boys and girls are taught the same in the first few grades and in the third grade the boys are begun on woodworking type projects.

"The funny thing about their embroidery," she related, "is that they do not use a hoop as we use here in America for embroidery."

Mrs. Woodward has extended herself to the German-American club for women which has as its main purpose the furthering of relationships between the two countries. She is completing a term as president and will continue this fall as president of the American segment of the group.

"We have officers for both segments and meet together for our business sessions monthly and then once each month we also bring the husbands along usually for a dinner meal where the menu varies from German to American."

She has been a member of the club for three years and said that the current emphasis for the club is in bringing the youth of the two countries together in a better understanding.

During their stay in Germany, the Woodwards have taken numerous side trips. Some have been strictly for pleasure and others have been in connection with his company's annual convention.

The first year the couple went to Lisbon, Portugal, driving with another American couple; the second year to Marbella on the southern coast of Spain where they also drove through France, Switzerland and were in Tangiers on the northern coast of Africa. The third year they went to Rome, Italy taking their children along on the campout.

"In April 1968 we went to Budapest, Hungary which was our first real experience behind the Iron Curtain. That would make a story in itself," said Woodward.

Their most recent touring and convention trip to Tunisia in northern Africa.

"Our six weeks trip to the United States was planned this year to re-Americanize our children," said Woodward. "They play with German children and speak fluent German on the playground although at home we continue our English training."

The Woodwards went to Germany planning to stay only five years, but now expect to remain in Germany at least until 1972 as they have changed their schedule to fit with the impending summer Olympics that summer.

They will return to Germany August 27 after completing their visit with friends and relatives in Canyon and taking a few weeks' visiting with friends and relatives in San Antonio.

HOME ON AN AMERICANIZING holiday are Mr. and Mrs. Gerald Woodward and their three children, from left, Carolyn and Sheri and young son, James. They are visiting with her mother, Mrs. Gladys Haines, and other relatives while on holiday in Canyon.

Jams-Jellies Tasty Treats

A treat on the breakfast table and at snack time is the result of jellies, jams, preserves, marmalades and butters made from fresh fruit during the summer season.

Numerous varieties of fruit lend well to several forms of preservation.

Homemade jams, jellies and preserves are also welcome gift items at the holiday season.

Juice from summer's plentiful supply of fruit may be canned as juice and used later in the season to make into jellies. Pulp may also be canned for later use in jams.

Concentrated frozen orange and grape juices may also be made into jelly as needed. Strawberry and peach jam may be made as needed from supplies of frozen foods.

Amounts of fruit juice, pulp, sugar and jelling perservatives vary for each type of jam or jelly. Consult the home demonstration agent, Mrs. Becky Hall, for particular recipes relating to making the jellies and jams. Recipe sheets are also available at your local grocery store in connection with the brand of jelling preservative you are using.

Preserves and marmalades are similar in texture in that both have tidbits of the fruit incorporated. Jams are made from crushed fruit, mixed with sugar and boiled into a mixture of even consistency. (Sometimes jams are strained.) Conserves are a combination of several fruits and are often combines with nuts and/or raisins. Fruit butters make use of fruit pulp which has been pressed through a sieve, cooked with sugar and spices to a thick consistency which shows no separation of fruit and juice.

Due to the availability of jam and jelly recipes to the average homemaker, this article will devote selected recipes to preserves, butters and a few other specialties.

PEAR PRESERVES

1 pound prepared pears
3/4 to 1 pound sugar

Select pears that hold their shape and have a good flavor. Allow fruit to reach the firm-ripe stage. Wash, pare and cut fruit into uniform pieces and core.

Combine fruit and sugar in alternate layers in a container and let stand 8-10 hours or overnight before cooking or else cook at once with sugar and 1/4 cup water to a pound of fruit.

Stir carefully while heating to boiling. Cook until the syrup is somewhat thick, stirring occasionally to prevent burning.

Fill hot, dry, sterilized jars full with the preserved fruit. Seal, label and store. If using parafiin to seal, leave headspace of about 1/4 inch.

* * *

STRAWBERRY PRESERVES

1 pound strawberries
3/4 pound sugar

Select firm, tart berries. Wash, drain and remove caps. Sprinkle sugar over fruit and cook immediately. Boil 10 minutes, stirring to prevent scorching. Pour into a flat pan and let stand overnight. Drain berries and fill hot sterilized jars. If syrup is thin, boil until thick before placing in jars.

* * *

Additional recipes for pineapple, plum, tomato and watermelon rind preserves are available at the home demonstration agent's office.

Recipes for marmalades and various fruit butters are also available from Mrs. Hall.

FRUITS AND VEGETABLES in season are a savings to the food budget when preserved through canning and freezing methods. Leaflets and booklets of information on all phases of home food preservation are available in the offices of the Randall County Home Demonstration Agent.

Time And Quality Of Food Is Essential To Canning

"Two hours from garden to jar" is a good slogan to follow in preserving foods.

The quality of canned products can be no higher than the quality of the raw food chosen for canning. All foods should be in prime condition and at the peak of flavor and texture.

Choose a variety that lends itself well to cooking and canning. In purchasing food for home canning, make sure it is not over-mature and stale. Foods which are allowed to stand several hours or days have normal changes impairing flavor, nutritive value and preserving quality.

Every particle of food that is to be canned must be sound and free from bruised spots, decay or other indications of spoilage. Processing will be made easier and more effective if contamination is kept at a low level meaning that all foods should be washed very thoroughly and then lifted out of the washing water. Foods should be washed in small quantities to free them of soil. Do not allow foods to stand in water for long periods as nutrients in some foods are water soluble.

Fruit for canning should be fully ripened but still firm. Unripened fruit is not as sweet and the natural flavor has not developed.

Fruit should be canned as soon as possible after gathering. Small fruits such as cherries, plums and berries should be carefully picked over and any overripe, bruised or sour ones discarded. They should be washed thoroughly to remove dust and strawberries should be washed a second time after hulls are removed.

Large fruits such as peaches, pears and apples should be thoroughly washed before paring. Soft or overripe fruits that have not soured may be used for making fruit butters and jams. The peel from many fruits may be boiled with a small amount of water and the resulting juices may then be used for making jellies.

In canning vegetables select young, tender vegetables which have been freshly gathered. Delay in canning gives bacteria in the food an opportunity to multiply and makes them more difficult to process. Tough over-mature vegetables will result in a finished product that is poor in both quality and flavor. As a general rule, older vegetables need longer processing in order to prevent spoilage.

The sweet flavor of such vegetables as corn and peas changes rapidly after gathering, and delay in canning results in considerable loss of flavor and nutritive value.

After vegetables have been graded for size and degree of maturity they should be washed thoroughly as soil clinging to the vegetables may carry bacteria that will not be destroyed in the processing, resulting in spoilage of the canned food.

Meats, which may also be canned, must come from healthy animals and fowl. Meat should be cooled until there is no longer any animal heat and handled carefully to get best results. Each piece of meat should be cleansed before canning by wiping with a clean damp cloth and washed when necessary to remove excess blood.

Canning is one way of maintaining an adequate food supply for your family. The process of canning was begun by Nicholas Appert who discovered that foods kept indefinitely when cooked in glass bottles which were sealed with cork stoppers.

Appert became interested in the project when the French Government offered a reward for the discovery of a method of preserving foods for its armed forces and he won the award in 1809. Appert's containers and processing vessels were crude, but his methods of canning were basically the same as used today.

At the time of Appert's discovery, many little "glass houses" were located in the United States. Some of them made jars, but nobody knew how to make one which was easy to seal airtight.

In 1858, John Mason, a tin smith, was granted patent rights on a screw thread neck feature of a glass jar. The jar sealed with a one-piece cap which screwed down on a rubber. The 1858 patent mark was used until about 1900 by numerous glass manufacturers.

In 1903, Alexander H. Kerr perfected and introduced the economy jar which sealed with a metal cap having a sealing gasket attached instead of the rubber ring inserted between the jar and cap.

In 1915, Kerr invited the now famous two-piece Kerr-Mason self sealing brand which was a major advancement in home canning.

Although over 20 million families in the United State commonly can fruits and vegetables there are still many millions in other countries--China, India, South America, etc.--who have yet to hear of, see and process home canned foods.

Following are canning tables used in pressuring foods (fruits and vegetables) for home canning. Some foods may also be preserved through a boiling water bath type of preservation. For complete preservation booklets and information contact the local home demonstration agent, Becky Hall.

TIME TABLE FOR FRUITS

		Boiling Water Bath (Minutes)	Pressure Cooker	
			Pts. & Qts. (Minutes)	Lbs.
Apples	Wash, pare, core, cut in pieces. Boil 3 to 5 min. in syrup. Pack. Add syrup or water.	25	10	5
Apricots	Wash, halve and pit. Pack. Add syrup or water.	20	10	5
Berries (except Strawberries and Cranberries)	Wash, stem, pack. Add syrup or water.	20	8	5
Cherries	Wash, stem, pit. Pack. Add syrup or water.	20	10	5
Figs	Boil in water 2 min. Use this water to make syrup. Boil 5 min. in syrup. Pack, add syrup.	30	10	5
Grapes	Wash, stem, pack. Add syrup or water.	15	8	5
Peaches	Peel, pack, add syrup, or boil 3 min. in syrup, pack, add syrup.	20	10	5
Pears	Peel, halve, boil 3 to 5 min. in syrup. Pack. Add syrup.	25	10	5
Pineapple	Slice, peel, remove eyes and core. Boil in syrup 3 to 5 min. Pack. Add syrup.	30	15	5
Plums	Wash, prick skins. Pack. Add syrup.	20	10	5
Rhubarb	Wash, cut into pieces. Pack. Add syrup. Or bake until tender. Pack. Add syrup.	10	5	5
Tomatoes	Scald ½ min., cold dip, peel, core, quarter. Pack.	35	10	5
Tomato Juice	Peel, quarter; simmer until soft. Put through fine sieve. Bring to boil. Pour in jars to ¼ inch of top.	10	—	—

TIME TABLE FOR VEGETABLES

A pressure cooker is recommended for processing low-acid foods as it gives a greater degree of safety.		Pressure Cooker Minutes			Boiling Water Bath Pts. or Qts.
		Pts.	Qts.	Lbs.	
Asparagus	Raw Pack—Wash, trim and pack raw. Hot Pack —Wash, trim, boil 3 minutes. Pack hot.	25 25	30 30	10 10	— 3 Hours
Beans (String or Wax)	Raw Pack—Wash, string. Cut or leave whole. Pack. Hot Pack —Wash, string. Cut or leave whole. Boil 3 minutes and pack.	20 20	25 25	10 10	— 3 Hours
Beans, Lima	Raw Pack—Shell. Pack raw and loosely to 1 inch of top. Hot Pack —Shell. Bring to boil. Pack loosely.	40 40	50 50	10 10	— 3 Hours
Beets	Hot Pack —Wash, leave roots and tops long. Boil 15 minutes. Skin. Pack.	25	40	10	2 Hours
Carrots	Raw Pack—Wash, peel, slice or cube. Pack raw. Hot Pack—Wash, peel, slice or cube. Bring to boil and pack.	25 25	30 30	10 10	— 2 Hours
Corn (Whole Grain)	Raw Pack—Cut from cob. Pack raw and loosely. Hot Pack —Cut from cob. Bring to boil. Pack.	55 55	85 85	10 10	— 3½ Hours
Greens (all kinds)	Hot Pack —Wash thoroughly. Steam or boil to wilt. Pack loosely.	45	70	10	3 Hours
Parsnips or Turnips	Raw Pack—Wash, peel, slice or cube. Pack raw. Hot Pack —Wash, peel, slice or cube. Boil 3 minutes. Pack.	20 20	25 25	10 10	— 1½ Hours
Peas	Raw Pack—Shell, wash. Pack raw and loosely. Hot Pack —Shell, wash. Bring to boil. Pack loosely.	40 40	40 40	10 10	— 3 Hours
Peppers (Pimiento)	Hot Pack —Place in moderate oven 6 to 8 minutes, or in boiling water. Peel, stem, cut out seeds, flatten. Pack without liquid.	10	10	5	40 Min.
Potatoes, Irish	Raw Pack—Wash and scrape small new potatoes. Pack. Add boiling water.	40	40	10	

NOTE — All vegetables except tomatoes, also all meats, poultry and fish canned at home must be boiled in an open vessel 10 to 15 minutes before tasting or using.

Council Of Executives Organized

A group of dollar-a-year executives is being organized to assist in the future growth of the School of Business at West Texas State University.

Dr. C. C. Callarman, who as dean of the school has directed its outstanding growth for 13 years, said three men approached so far have agreed to serve on a Council of Executive Consultants.

"We hope to have about a dozen of these men who are willing to give freely of their time and knowledge," Callarman said.

The first three members of the council are F. V. Wallace, former corporation secretary of Shamrock Oil & Gas Co. and one-time mayor of Amarillo; Hugh "Buck" Burdette of Pampa, retired executive officer with Cabot Crop. of America, Boston; and Dr. Floyd Golden, president for 26 years of Eastern New Mexico University and now retired from that position.

The council idea was formulated, Callarman said, "with the idea of giving West Texas State University the benefits of these men's management ability. They will serve the students and the faculty."

The consultants will be given office space, computer time, secretarial help and "they will be free to do any writing they want," Callarman said. "It will be an outlet for their creativity."

Callarman said the consultants will be paid one dollar a year and will be in a position to represent the School of Business at various functions.

"These men will prepare lectures in their special fields of interest," he said. "They will lecture to all levels of students --freshmen as well as graduates."

During the past school year, Wallace arranged for a number of outstanding persons in business and industry to present lectures in the School of Business.

They included Emmett R. Johnson, administrator of High Plains Baptist Hospital, Amarillo; Allen Shaw of Shaw Associates, Amarillo; Dwaine Mires, director of employe relations of Shamrock Oil & Gas Co., Amarillo; Chuck Allen, executive vice president of First National Bank, Canyon; David M. Fricks, personnel staffing specialist, Red River Army Depot, Texarkana; Bill Wilson, general manager of the Amarillo Municipal Airport; John Stiff, Amarillo city manager; Bill Montgomery, executive vice president of Shamrock Oil; Richard M. Roth, personnel manager of Levi Strauss & Co., Amarillo; Farris Oden, president of Western National Life Insurance Co., Amarillo; and Virgil Patterson, chairman of the board of First National Bank, Amarillo.

"We have been delighted with their contributions to our program," Callarman said, "and feel it has been mutually beneficial to the men and to the school."

Funeral Held For Stroud, 80

Funeral services for William Herbert Stroud, 80, were conducted Wednesday at the First United Methodist Church in Canyon.

Rev. Newton Starnes, former pastor of the church now from Lamesa, officiated with assistance from Rev. J. Frank Peery, pastor. Interment was at Memory Gardens Cemetery under the direction of Blackburn-Shaw Funeral Directors of Amarillo.

Mr. Stroud, a native of Kerrville, Arkansas, died Sunday in Coon Memorial Resthome at Dalhart. He was retired manager of grain elevator cooperatives at Canadian and Canyon.

He came to Canyon in 1928 and owned and operated a grocery store here until 1946, when he became manager of the Canyon Co-op Grain Elevators. In 1954, he went to Canadian to operate a grain cooperative there. He retired and moved back to Canyon in 1961 where he was a member of the First United Methodist Church.

The family requests that memorials be contributions to Boys Ranch or favorite charities.

Survivors include a son, Herbert Stroud of Amarillo; a brother, Buster Stroud of Amarillo; two sisters, Mrs. Dennis Murphey of Austin and Mrs. Alma Powell of Duke, Oklahoma and two grandchildren.

Mr. and Mrs. Charles Triplett and Larry of Plainview spent the week end in the Arvin Triplett home.

STATE OF TEXAS
Texas Water Development Board
Austin, Texas

Texas' Future Hinges on Water Amendment Ballot August 5

Texas voters will ballot Aug. 5 on a constitutional amendment that would provide the State of Texas the capability to authorize the issuing of $3.5 billion in water development fund bonds for Texas' share of the $9 billion Texas Water Plan.

Their decision on this first Tuesday in August will chart the course Texas will follow into the next century---a course leading to unprecedented economic growth and prosperity for the entire state, or a path leading to decline and stagnation caused by the lack of adequate water for the state's villages, towns and cities, its industries, and for its irrigated agriculture.

The Amendment---Number 2 on the ballot---authorizes an increase in the Water Development Fund of $3.5 billion; removal of the 4 per cent interest rate limitation on the Fund's bonds and authorizes the rate to be set by legislative enactment; expands use of the Fund for the development of water resources for the State, both within and without the limits of the state; removes the Dec. 31, 1982 cutoff date for use of the bond funds to assist political subdivisions of the state to develop their water resources; empowers the Water Development Board to contract with federal agencies, other states, foreign countries---such as Canada---and others for the development of water resources and the bonds would not be used for gifts or grants. They would be repaid---with interest---by the users of water. The Texas Water Plan is based on the concept that all reimbursable costs of water developments would be repaid by those who use the water.

Planners from the Texas Water Development Board estimate that Texas, after a full development of its water resources, will have a shortage of 12 to 13 million acre feet annually by 2020. An acre foot is 325,581 gallons.

To overcome this anticipated shortage, the Texas Water Plan proposes the importation of some 13 million acre feet of surplus water each year from the lower Mississippi River to meet an estimated requirement of 32 million acre feet for growing cities, industries, and agriculture.

The immense Texas Water Plan proposes the construction of 67 dams and reservoirs---with 33.6 million acre feet of conservation storage and 16.1 acre feet of flood control---at an estimated cost (in 1967 dollars) of $2.4 billion. Remaining costs would amount to some $6.5 billion.

The Texas Water Plan sketches a massive network of transstate transmission canals spanning north Texas and the Gulf Coast, connecting pipelines, pumping stations, and power plants---possibly nuclear powered.

The 500-mile concrete-lined northern canal would begin in the upper Sulphur River basin of east Texas and extend westward past Lubbock in the Hig Plains, turn south and west t the Trans Pecos where a pipeline would connect with th canal for movement o municipal and industrial wate to El Paso. The Trans-Texa division would carry about 1 million acre feet of water a yea for northern and western Texas

In addition to serving th Northeast Texas basins, th cities of Dallas, Fort Worth Lubbock, San Angelo, Abilene Odessa, Midland, and othe communities, the division, wit its offshoot pipelines, woul provide irrigation water fo north central Texas, the Hig Plains, and the Trans Peco

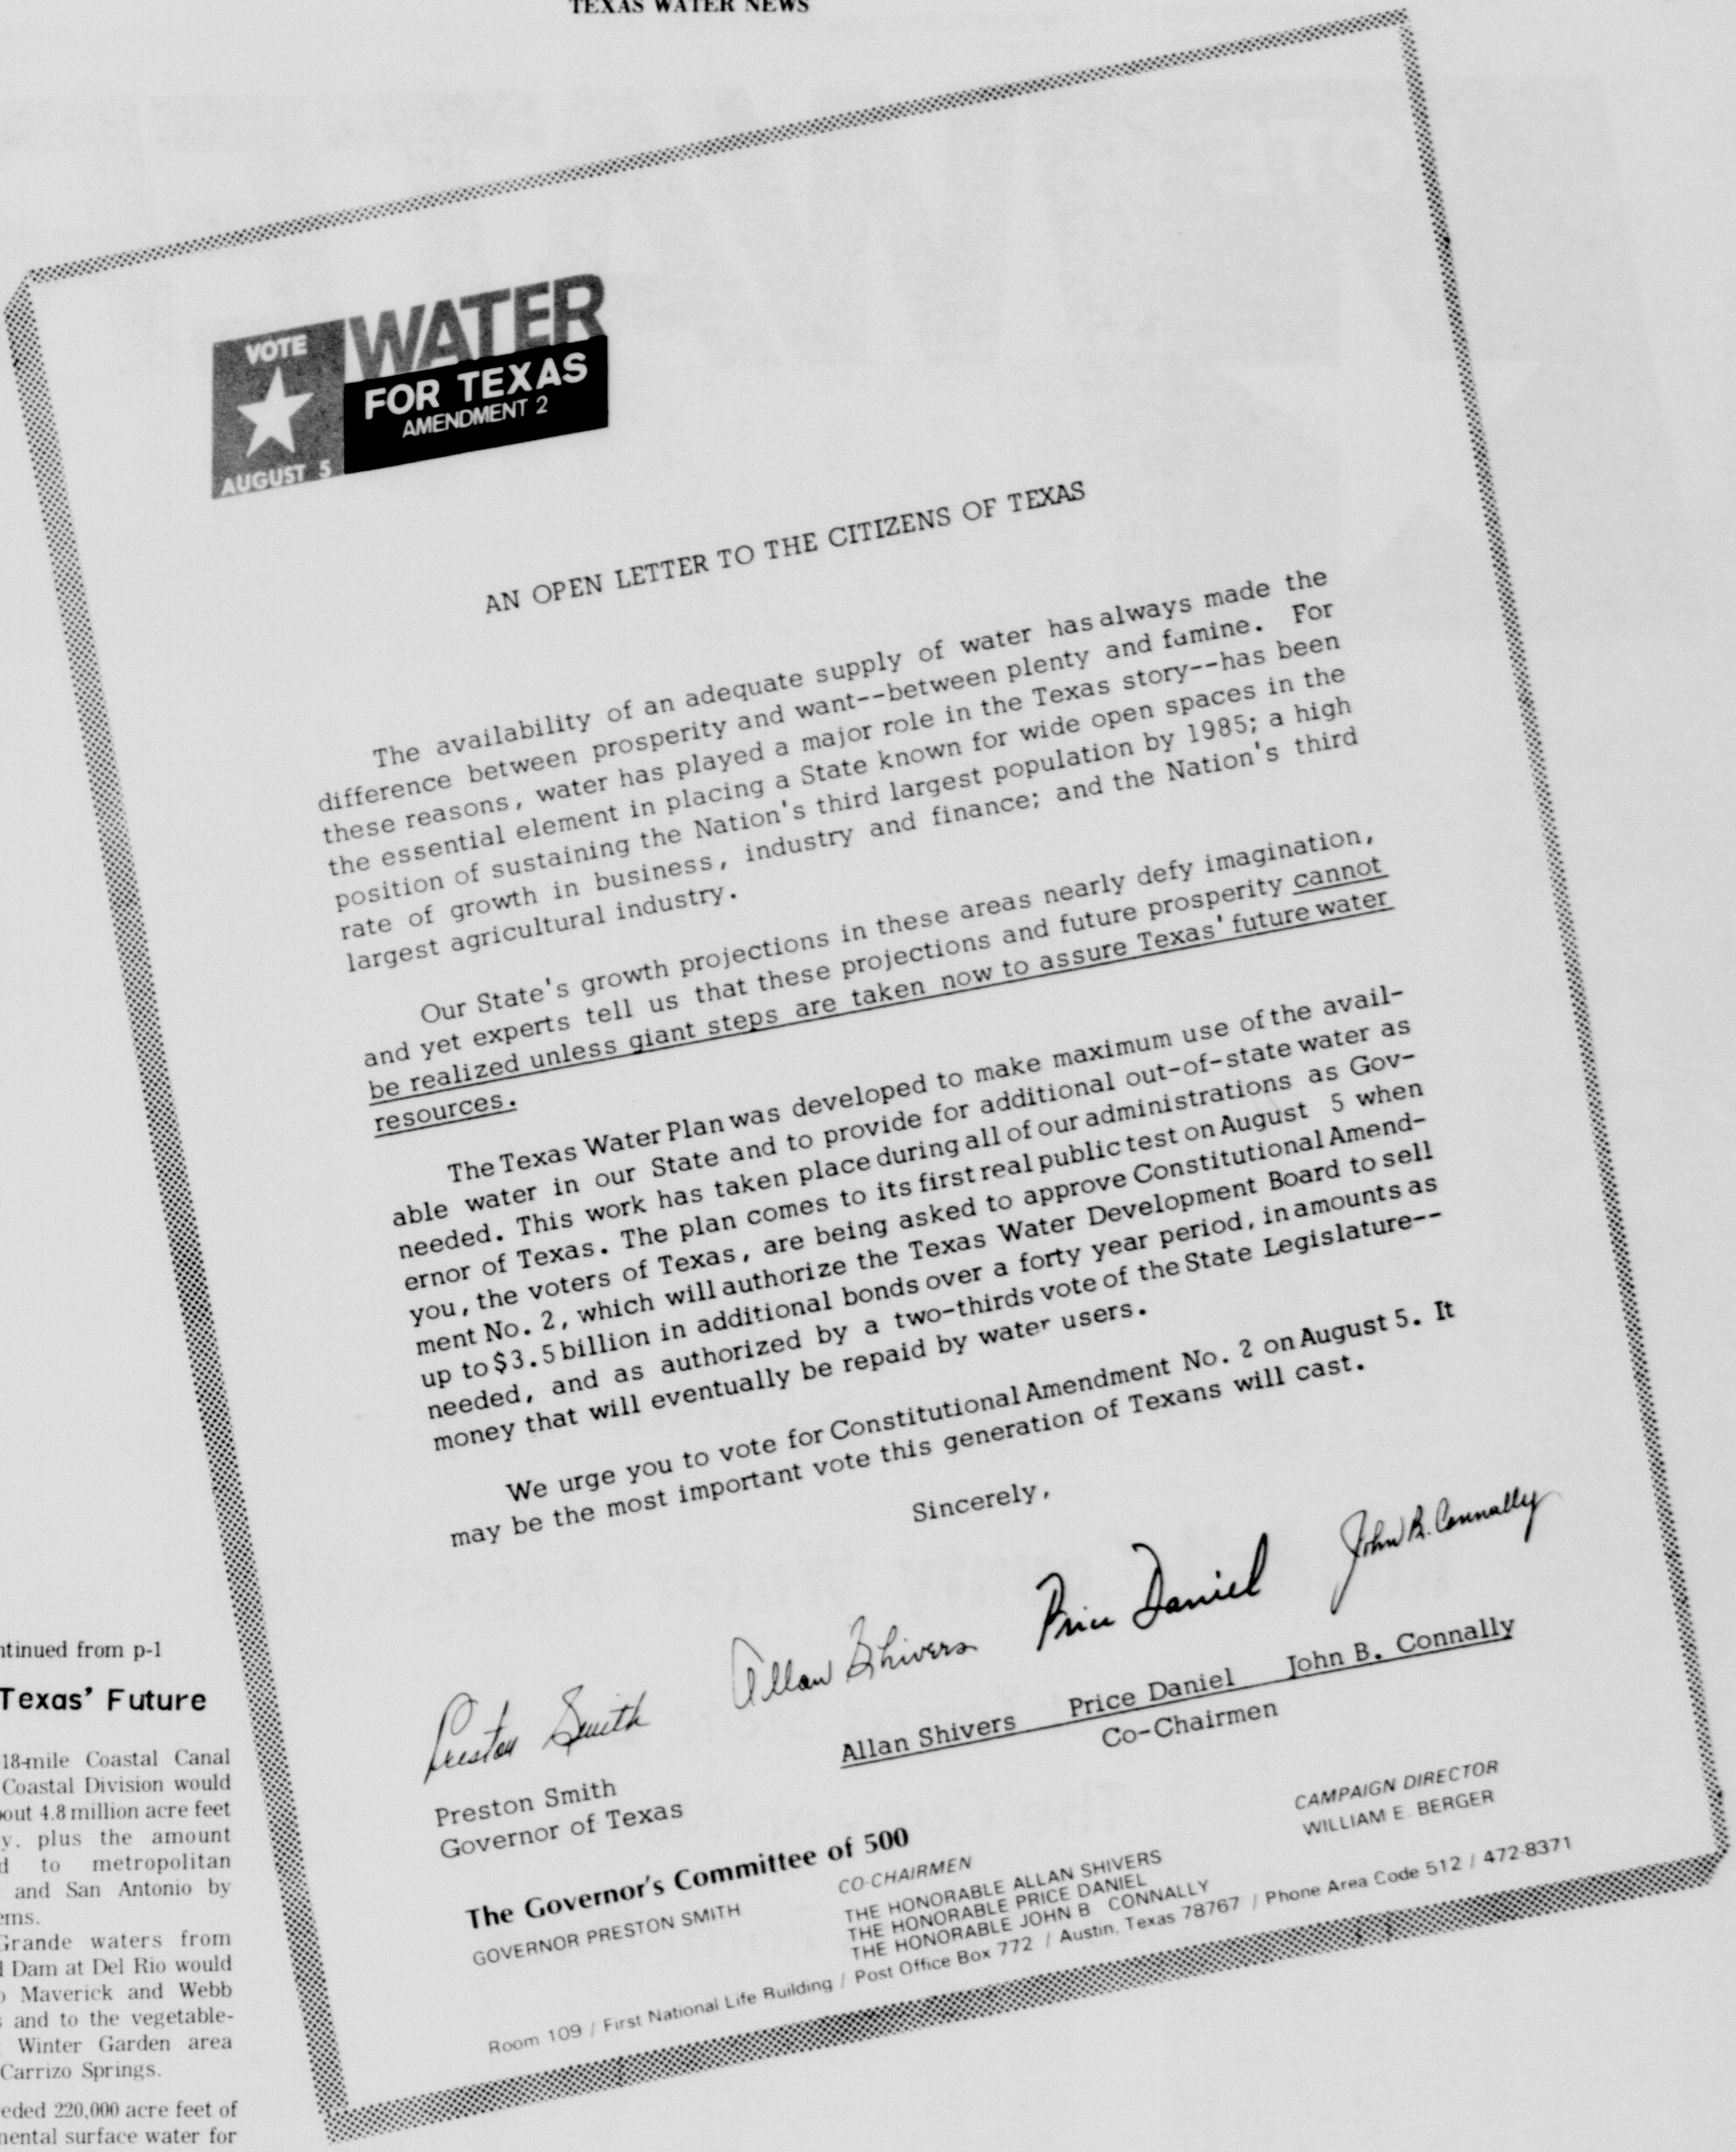
"THANK YOU!"

The publishers wish to take this means of saying "thank you" to the Texas Parks and Wildlife Department, the Texas Highway Department, the Texas Tourist Development Agency, the Santa Fe Railroad, Central Power and Light Co., Aluminum Company of America, and the Texas water Development Board for photographs used in this edition. Their cooperation is greatly appreciated.



VOTE
WATER
FOR TEXAS
AMENDMENT 2
AUGUST 5

AN OPEN LETTER TO THE CITIZENS OF TEXAS

The availability of an adequate supply of water has always made the difference between prosperity and want--between plenty and famine. For these reasons, water has played a major role in the Texas story--has been the essential element in placing a State known for wide open spaces in the position of sustaining the Nation's third largest population by 1985; a high rate of growth in business, industry and finance; and the Nation's third largest agricultural industry.

Our State's growth projections in these areas nearly defy imagination, and yet experts tell us that these projections and future prosperity cannot be realized unless giant steps are taken now to assure Texas' future water resources.

The Texas Water Plan was developed to make maximum use of the available water in our State and to provide for additional out-of-state water as needed. This work has taken place during all of our administrations as Governor of Texas. The plan comes to its first real public test on August 5 when you, the voters of Texas, are being asked to approve Constitutional Amendment No. 2, which will authorize the Texas Water Development Board to sell up to $3.5 billion in additional bonds over a forty year period, in amounts as needed, and as authorized by a two-thirds vote of the State Legislature--money that will eventually be repaid by water users.

We urge you to vote for Constitutional Amendment No. 2 on August 5. It may be the most important vote this generation of Texans will cast.

Sincerely,

Preston Smith

Continued from p-1

. . . Texas' Future

area.

The 418-mile Coastal Canal and the Coastal Division would carry about 4.8 million acre feet annually, plus the amount supplied to metropolitan Houston and San Antonio by subsystems.

Rio Grande waters from Amistad Dam at Del Rio would move to Maverick and Webb counties and to the vegetable-growing Winter Garden area around Carrizo Springs.

As needed 220,000 acre feet of supplemental surface water for San Antonio could be provided from reservoirs in the Guadalupe and San Antonio rivers basins. Houston could be provided with additional surface water from the Brazos, the San Jacinto, the Trinity and the Neches river basins.

The Coastal Canal would supply municipal and industrial water for the Corpus Christi-Kingsville area and irrigation water for the Coastal Bend.

The Coastal Division would also provide 2.5 million acre feet of additional fresh water each year to the valuable bay and estuary system and to wildlife refuges, thus maintaining and enhancing their sports, commercial and aesthetic value to Texas and to the nation.

Timing of the developments proposed by the Texas Water Plan is an extremely critical factor, say Water Development Board planners. "Our best estimates indicate that by or before 1990 some of our metropolitan areas---Corpus Christi, San Antonio, El Paso---will need supplemental water to meet their growing requirements," said Howard B. Boswell, executive director of the Board.

"By 1985 ground water supplying irrigation on the South Plains will have been depleted to the point that agriculture will be increasingly dependent on dry-land farming," Boswell added.

"If this occurs, the entire state will suffer economic losses in investments, banking, insurance, transportation, markets for agricultural equipment and supplies, and the loss of population," he added.

Texans old enough to vote in the Aug. 5 election remember well the drought of the 1950's and what it's like to be without water. Water rationing was the rule in most Texas towns and cities. Lakes dried up. And farmers saw their land crack from the dry heat and crops die. Pastures dried and died, and ranchers sold their herds.

Texas' water planners hope to ease the plight of Texans, **should drouth strike again, by** the development, conservation and wise use and management of the state's water resources. Supporters of the Plan and Amendment No. 2 are hoping Texans recall the dry, dusty days of 1950-57 on Aug. 5.

Amendment No. 2

Someone has said—facetiously, yet seriously—"there are 11 million reasons to vote for Constitutional Amendment No. 2 on Aug. 5—the People of Texas.

The Amendment, approved overwhelmingly by the 61st Legislature, broadens the powers of the Texas Water Development Board and the purposes of the Water Development Fund; eliminates the interest limitations (4 per cent) on Texas Water Development Bonds; raises the authorized amount of Texas Water Development Bonds by $3.5 billion; extends the maturity schedule on Texas Water Development Bonds from 40 to 50 years; eliminates the Dec. 31, 1982 cutoff date for financial assistance by the Board to political subdivisions for the development and improvement of their water supply systems; and empowers the Board to contract with the federal agencies, other states, foreign governments—such as Canada—and others for the development of water resources and facilities.

Voters of Texas will have their say on the proposed amendment to the Constitution on Aug. 5.

Basically, the proposed Amendment would provide the State of Texas with the capability to finance its share of the cost of the Texas Water Plan, estimated to be (in 1967 dollars) $9 billion. The balance of the costs initially financed by the federal government.

An important aspect of the Texas Water Plan, however, is that the entire projects' cost will ultimately be paid by water users. So the real question is not "Who will pay?" but, rather, "Who will advance the money?"

In this respect the State is performing the function of a banker supplying funds for interim financing. All costs to the State, both principal and interest, will be recovered—although the recovery will be spread over a long period of time.

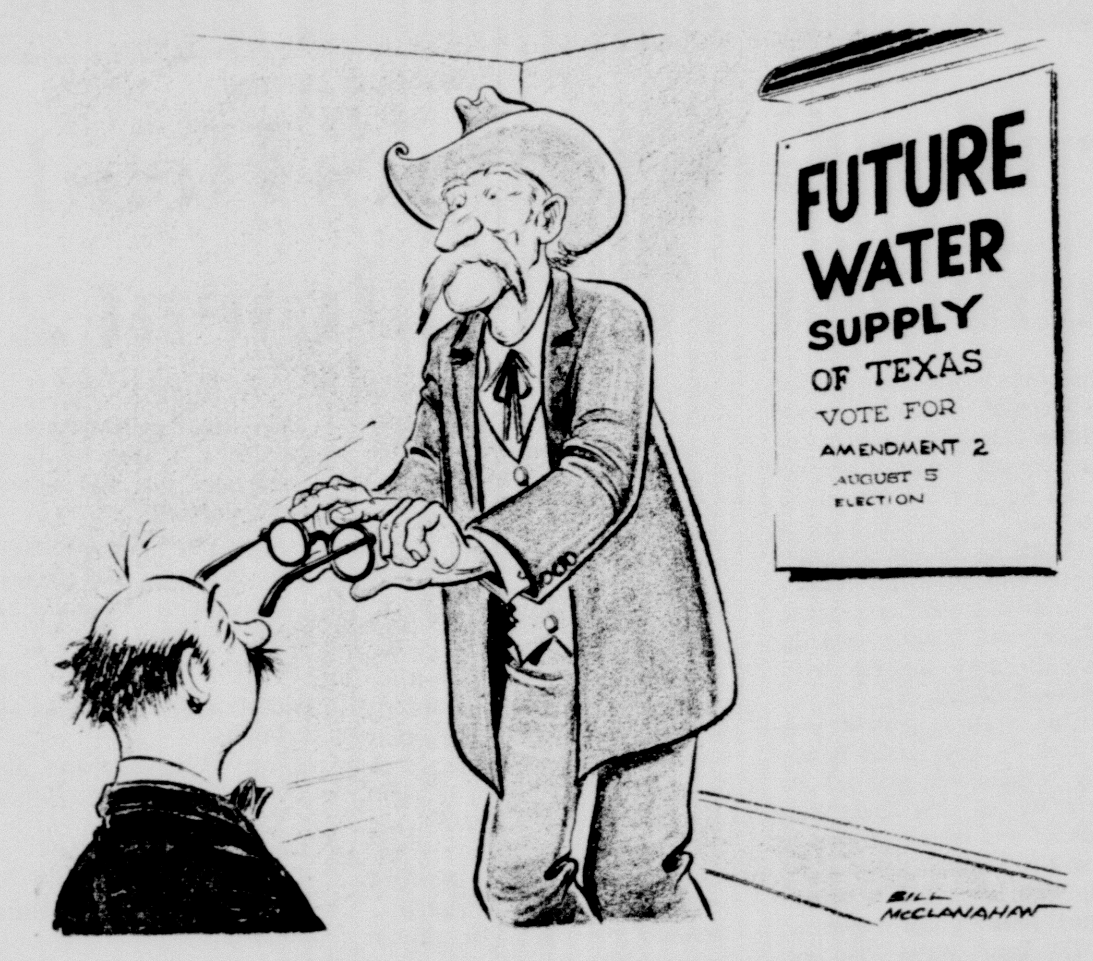
Before any of the $3.5 billion in bonds could be issued—they will be issued over a period of 40 to 50 years—two-thirds of the Legislature must give approval. The bond funds will not be used for gifts or grants. Funds provided for the development of water resources must—and will—be repaid the State with interest.

Of the State's estimated $3.5 billion share of financing, $2.3 billion is earmarked for development of municipal and industrial water supplies; $65 million is earmarked for the cost of storage acquisition in reservoirs not a part of the Texas Water System; $600 million is set aside for future loan programs of the Texas Water Development Board; and $500 million for contingencies.

Approval of the Amendment on Aug. 5 will give the State the flexibility needed in the full development of the State's water resources for the benefit of the people of Texas.

Look At It With 2020 Vision

By BILL McCLANAHAN
Dallas News Staff Cartoonist



Water Plans Will Meet State's Needs

Texas is entering a new era in the development of its water resources, an era unequalled in the state's long history.

To meet the water requirements of booming, dynamic Texas and its projected growth of 30.5 million people in the year 2020, the Texas Water Development Board has prepared a $9 billion master plan for the development of Texas water resources.

Highlighted by far-sighted proposals to transport surplus waters from the Mississippi River and moisture-rich east Texas by giant canals to parched west and south Texas and parts of New Mexico, the Plan represents more than a decade of intensive study and an expenditure of about $10 million. Estimated state share of overall project costs (in terms of 1967 dollars) is $3.5 billion. Federal and local funds would pay for the rest.

The Plan provides for the construction of 67 dams and reservoirs and alternates, huge transmission canals and pipelines, pumping stations, and power facilities for the movement of vast quantities of water annually to water-deficient area—about half of Texas—to meet the needs of towns and cities, industries, and agriculture. Other beneficial water requirements will also be met by the Plan.

Three divisions—the Trans-Texas, Coastal, and Eastern—form a dramatic part of the Texas Water Plan.

The Trans-Texas Division will supply municipal, industrial and agricultural requirements in the Northeast Texas basins, the Dallas-Fort Worth area, the North Central sector, the South Plains, Trans Pecos, El Paso, and eastern New Mexico.

A total of 10.3 million acre feet a year will move through the huge system from an Interstate System and from Northeast Texas across the top of Texas holding reservoirs on the Caprock near Lubbock for distribution to the Plains, Trans Pecos, El Paso and Eastern New. Mexico. New Mexico will receive 1.5 million acre feet of out-of-state water while 7.5 million acre feet will be allocated to agriculture along the route served by the Canal. Municipal and industrial users will receive 950,000 acre feet of water to satisy their requirements.

The Coastal Division will supply some 4.5 million acre feet annual water for municipal and industrial uses, for irrigation, the bays and estuaries and for wildlife refuges from the Sabine River to the Lower Rio Grande Valley.

Estimated water requirements west and south of the Brazos River, plus inflows into Galveston Bay but excluding Houston and San Antonio requirements, are 1.8 million acre feet for irrigation, 2.5 million additional acre feet for bays and estuaries, 433,000 acre feet for municipal and industrial supplies, and 60,000 acre feet for fish and wildlife.

Water supplies for Houston can be met by several alternatives, including combinations of supply from the Brazos, Trinity, San Jacinto, and Neches river basins, ground water, and water from the Coastal Canal.

Cuero, Cibolo, and Goliad reservoirs, with Cannon reservoir and a pipeline system, part of the Coastal Division, can, through systems operation, supply San Antonio with 220,000 acre feet of water annually to supplement available ground water from the Edwards Aquifer.

The Winter Garden area, southwest of San Antonio, can be served by conveyance of releases out of Amistad Reservoir on the Rio Grande. Water supplied from Amistad to irrigators in these areas will be replaced in the Lower Valley by deliveries through the Coastal Canal.

The Eastern Division of the System includes facilities which will be required to move water imported from out-of-state sources to the Trans-Texas and Coastal divisions.

Subject to the results of feasibility studies, the Board proposes that design and construction begin in the following sequence:

(1) Storage facilities in South-

See WATER PLANS, p-5

AN EDITORIAL: — ARLINGTON CITIZEN

Texas Water Plan a "Must"

TEXANS ON AUGUST 5 will determine the course our state will take into the next century. One course, begun nearly two decades ago and ready for action now, will provide adequate water resources to keep Texas moving ahead with vision and determination. The other leads to stagnation and decline because of an inadequate water supply.

WHAT IS AMENDMENT NUMBER TWO?

Amendment No. 2 authorizes the Texas Water Development Board to issue $3.5 billion in bonds to finance Texas' share of the cost of the Texas Water Plan. This money is not to be used to provide gifts or grants, but will provide temporary financing which will be repaid by water users. The Amendment also removes the 4 per cent ceiling on Water Development Bonds.

WHAT IS THE TEXAS WATER PLAN?

The objective of the Texas Water Plan is to provide adequate water to maintain the growth and prosperity of Texas into the next century when it is estimated that we will have a population of 30.5 million people. The Plan provides for the full development of our water resources and the importation of surplus water from the lower Mississippi River for distribution to areas with declining water resources.

WHO IS TO PAY FOR THE PLAN?

Cost of the $9 billion Texas Water Plan – Texas' share is estimated at $3.5 billion – will be shared by local, state and federal governments, with those who ultimately use the water paying much of the costs of the Plan.

WHY DOES TEXAS NEED A WATER RESOURCE PLAN?

By the end of this century – in just 31 years – Texas will not have enough water to supply its growing cities, its expanding industry, and its irrigated agriculture. To assure an adequate water supply, the state has prepared a plan for the full development, management and use of its water resources – and an imported water supply – to serve Texas to the year 2020 and to assure all Texans water to meet their needs.

WILL THE PLAN PROVIDE ADEQUATE WATER FOR TEXAS?

Yes. With our current major reservoirs (157), the proposed full development of our water resources (67 dams and reservoirs) and an imported supply of water, Texas can meet its water demands to the year 2020.

WHO WILL BENEFIT FROM THE PLAN?

The people of Texas will benefit from the Texas Water Plan. The Plan provides for meeting all essential and beneficial water requirements throughout the state. The Plan will provide water for domestic and municipal uses, for industry, for agriculture, for recreation, for our bays and estuaries, and for other beneficial purposes. The Texas Water Plan will provide Water for Texas!

Water Development Not New in Texas, Neither Is Financial Plan

Planning the wise use of water is not new in Texas. Neither is financing the development of the state's water resources although providing funds for water development projects is not as old as the development and wise use of the state's water resources.

Spaniards, in 1680, began the wise use of water resources of the land now called Texas when they began the first irrigation of crops near what is now El Paso. Indians in the area planned the use of their meager water resources long before the Conquistadores invaded the land and settled there. Planning, development, and use of Texas' waters has continued in some manner to the present.

Development of the State's water resources moved slowly during the '30s and '40s with most of the development being done by cities, river authorities, the Crops of Engineers and the Bureau of Reclamation.

The drought and floods through which Texas passed during 1950-57 gave impetus to planning the conservation and management of Texas' water resources.

The flood waters of the Spring of 1957 had barely receded when the Legislature passed the Water Development Act, establishing the Water Development Board. The people of Texas, recognizing their responsibilities and approved an amendment to the Constitution which provided $200 million to aid political subdivisions of the State to develop, conserve, and manage their water resources.

Since that time, cities and towns, river authorities, and water districts in all sections of Texas have received some $100 million in loans and commitments for the development of their water supply resources. Projects are located from Northeast Texas to the Lower Rio Grande and from the Panhandle to Southeast Texas.

The Texas Water Development Fund and its purposes have had the overwhelming support of Texans. In 1962, the Constitution was again amended and the Water Development Board, in the name of the State of Texas, was authorized to acquire conservation storage space in reservoirs to be constructed on Texas streams. This provided for the optimum development of the limited number of dam and reservoir sites in the State.

Four years later—in 1966—Texans again approved an amendment to the Constitution, this time increasing the $200 million Water Development Fund to $400 million and expanding use of the Fund by the Board to construct any system of works necessary for the filtration, treatment, and transportation of water from storage to points of wholesale purchase and distribution. This new authority assured the State's participation in the full development of its water resources for the benefit of all sections of Texas.

Late in 1957, the Legislature during a called session, passed the Planning Act of 1957, creating the water planning division within the then Board of Water Engineers. This function was transferred to the Water Development Board in 1965 by the Legislature when it charged the Board with the development of a Texas Water Plan for the entire State.

The Board in mid-1966 presented the preliminary Texas Water Plan. After 27 public hearings and a series of public meetings, the Board staff began revision of the Plan to meet objections voiced during the public hearings.

In December 1968, the Texas Water Development Board released the Texas Water Plan, as a flexible guide for the orderly development, conservation, and wise management of the State's water resources to meet the needs of Texas to the year 2020.

The total estimated cost of the Plan based on 1967 construction cost levels is $9 billion. It is estimated that the State's share of financing will be some $3.5 billion.

To provide the State's share of the cost, the 61st Legislature authorized an amendment to the Constitution which would authorize the Water Development Board, upon authorization by two-thirds of the membership of the House and the Senate, to issue $3.5 billion in bonds. These bonds will be issued in increments over a 40 to 50 year period as the need arises and implementation of the Plan progresses.

Officials of the Texas Water Development Board and supporters of the Amendment, Governor Preston Smith's Committee of 500, which includes former Texas governor John Connally, Price Daniel, and Allan Shivers, and Lt. Governor Ben Barnes and Speaker of the House Gus Mutscher, points out that the proposal for the State to provide interim financial assistance to aid development to water supply projects is **not** a new program, but one that has been effectively used in Texas fora dozen years. It is an expansion of a program that has already been approved three times by the voters of Texas, they explain.

The only difference in Amendment No. 2 and previous amendments is the amount of money and the broader purposes for which the funds can be used.

Heretofore, the Water Development Fund was designed and used to develop the water resources of the State in piecemeal fashion. It is now proposed to achieve full development of our water resources in orderly fashion for the benefit of the State's dwindling water resources and to provide import water from outside of Texas.

The purpose of the Amendment is to provide the State with the financial capablility that will be needed to place Texas in a strong position to discuss with the Congress and the federal agencies federal participation in the full development of Texas' water resources and place Texas in a position to have control of the development, management and use of its water resources.

Funds from the sale of bonds will be used to provide the interim financing necessary for payment of $2.3 billion of construction costs of that part of the Texas Water Plan allocated for municipal and industrial water; $600 million would be used for carrying on the present program of the Board which provides financial assistance to political subdivisions of the state for development of their water resources; $65 million would be used by the Board for storage acquisition in reservoirs not associated with the Texas Water System; and $500 million would be earmarked for contingencies.

The Amendment would also remove the present Dec. 31, 1982 cut-off date for the present program of financial assistance by the Board; it would empower the Board to contract with the federal agencies, other states, and foreign governments—such as Canada—for the development of water resources and facilities.

Board officials emphasize that the bonds would not be issued at one time, only in increments as needed over a 40 to 50 year period for implementation of the Plan. The bonds and debt service would be repaid from proceeds of sale of water to users. The Water Plan is based on the concept that all reimbursable costs of water development would be repaid, with interest, by users.

Such financing would require support from the general revenue fund of the state for meeting bond obligations during the interim between development of water supplies and development of local user capabilities.

General revenue fund support will be needed most during the 1978-91 period when it is estimated that the general revenue fund will be called upon to advance an aggregate amount of $630 million to pay debt service.

Beginning in 1992, however, the general fund should receive income to pay future principal and interest costs and start repayment of these advances.

The prestige of the State and its leaders has been placed behind the efforts to provide Texas with a plan—an effective plan—for meeting the State's water requirements into the next century. The decision is now up to the people of Texas.

Questions and Answers

Q. What is the Texas Water Plan

A. It is a flexible guide to the development, management and use of Texas' water resources and an imported supply to meet the State's water requirements to the year 2020.

Q. Who will benefit from the Plan

A. The people of Texas

Q. Will the Plan provide adequate water for Texas

A. Yes. Estimates indicate that Texas will need 32 million acre feet of water annually by 2020 for cities and towns, for industry, for agriculture, and for all other beneficial uses. The Plan provides for the full development of Texas' water resources and importation from the lower Mississippi River of 12 to 13 million acre feet of water each year to supplement the State's supplies.

Q. What is the cost of the Plan

A. About $9 billion (in 1967 dollars)

Q. What is Texas' share of the costs

A. $3.5 billion

Q. Who will pay the costs

A. Those who use the water

Q. Where will Texas get the money to finance its share of the Plan

A. From the sale of Water Development Fund bonds

Q. Will this be tax money

A. No. Although the investment in the construction of the Texas Water Plan will require support from the general revenue fund of the State for meeting bond obligations during the interim period between development of water supplies and development of local water user capacities. General revenue support will be particularly heavy during the 13 years (1978-1991) when it is estimated that an aggregate amount of $630 million will be required to pay debt service. It must be remembered, however, that the general fund should receive income to repay these advances. Over the life of the Plan, about 50 years, the State will recover all of the expended funds.

Q. Will the bonds be issued at one time

A. No. The bonds will be issued, upon two-thirds approval of the Legislature, over a period of 40 to 50 years.

Q. Is this method of financing water development in Texas a new program

A. No. In 1957, the voters of Texas amended the constitution and established the Texas Water Development Board and the Water Development Fund and authorized $200 million in Water Development Bonds. In 1966, the voters increased the fund to $400 million. Since then, some $100 million has been loaned or committed to political subdivisions of the state for the development of water supply facilities

Q. Is the Fund used to provide gifts or grants

A. No. The funds loaned must be repaid the State with interest.

2020 VISION

FORESIGHT is essential for progress. And a current advertisement of Philco effectively makes that point by saying, "For years, America's been shortsighted about its future water supply. We're helping to give California 2020 vision."

Texans today face the choice between nearsightedness and looking forward to future supplies of the essential element to support people, growing plants and industrial plants--water.

As the advertisement says, "Funny thing about water. There's so much of it around, people have wasted it, polluted it and frittered it away for years. And suddenly, there's water, water everywhere—except where it's needed."

California State Water Project is the subject of that advertisement, and reluctantly Texans must admit that in some ways the Far West has been more foresighted than we have.

But our leaders have come up with a sound, forward-looking Texas Water Plan which is so important for all parts of the state that it has been endorsed by many Texas leaders.

Among those actively engaged in working for the plan to provide water needs in Texas at least until the year 2020 are Gov. Preston Smith, former Governors John Connally, Price Daniel and Allan Shivers, Lt. Gov. Ben Barnes and Speaker Gus Mutscher of the Texas House. There are many others all over the state who know our region and its needs.

Some conservationists who are concerned about ecological changes of environment have voiced opposition. A few have even intimated that Texas--especially West Texas--should not try to grow in population, agribusiness and industrialization. This, we suggest, is myopic.

The News agrees that wildlife, marine life and other assets should be preserved and is confident that the sound leadership involved in the Texas Water Plan will work toward that end without sacrificing the needs of people.

First essential step toward acquiring 2020 vision is approval of Amendment No. 2 on the ballot in the Aug. 5 election. Texans who will be vacationing then should arrange to vote absentee for Amendment 2; those who will be at home should be sure to go to the polls on Aug. 5. (Dallas News)

GOV. PRESTON SMITH

GOV. JOHN B. CONNALLY

GOV. PRICE DANIEL

GOV. ALLAN SHIVERS

Governor, 3 Former Governors Head Blue-Ribbon Panel for Amendment 2

The men who talk Texas, live Texas and epitomize the sterling qualities of Texas leadership are manning the ramparts on behalf of Constitutional Amendment No. 2.

This proposal is expected to reflect the combined influence of the state's finest on election day, August 5. Heading the massive effort to implement the 50-year water program are the four governors whose regimes marked inception of the vast Water Plan and the successive step to make it operational.

In order of service the Chief Executives are Governors Allan Shivers, Price Daniel, John B. Connally and the present Governor, Preston Smith.

Speaking of his predecessors, Governor Smith said,

"I know of none in Texas who have individually or collectively contributed more to the development and conservation of the state's vital water resources than these former governors. Each during his tenure provided the leadership and gave the time and energy to the development of our water resources. Texas has benefitted from their devotion, and future generations of Texas will be the beneficiaries of their vision and leadership."

"The availability of an adequate supply of water has always made the difference between prosperity and want—between plenty and famine. For these reasons, water has played a major role in the Texas story--has been the essential element in placing a State known for wide open spaces in the position of sustaining the Nation's third largest population by 1985; a high rate of growth in business, industry and finance; and the Nation's third largest agricultural industry.

"Our State's growth projections in these areas nearly defy imagination, and yet experts tell us that these projections and future prosperity cannot be realized unless giant steps are taken now to assure Texas' future water resources.

"The Texas Water Plan was developed to make maximum use of the available water in our State and to provide for additional out-of-state water as needed. This work has taken place during all of our administrations as Governor of Texas. The plan comes to its first real public test on August 5 when you, the voters of Texas, are being asked to approve Constitutional Amendment No. 2, which will authorize the Texas Water Development Board to sell up to $3.5 billion in additional bonds over a forty year period, in amounts as needed, and as authorized by a two-third vote of the State Legislature—money that will eventually be repaid by water users.

"We urge you to vote for Constitutional Amendment No. 2 on August 5. It may be the most important vote this generation of Texas will cast."

Chairmen of the Governor's Committee of 500, comprising leaders from all parts of Texas are:

Attorneys - Joe Kilgore, Austin
Agri-Business - Harold Hinn, Dallas
Cities - Steve Matthews, Austin
Contractors - Jim Richards, Austin
Coordination - Rep. Bill Clayton, Springlake
County Officials - W. D. Henson, Dalhart

See GOVERNOR, p-5

Texas Can Rightfully Claim to be 'Land O' Lakes'

Move over, Wisconsin and Minnesota. Texas is hard after your claims to being the "Land O' Lakes."

Texas today has more square miles of inland water than any other state in the Union. And with the mammoth Texas Water Plan now off the drawing boards and the state policy for the future development of the state's water resources, Texas–particularly East and Southeast Texas—could well become the nation's water wonderland.

The variety of recreation available in Texas is unsurpassed among the 50 states. Whether vacationists and recreationists want only a few hours of fun, a vacation of several weeks, or permanent retirement, they have an almost endless choice in Texas.

Texas today has 157 major reservoirs constructed or under construction. And these lakes offer abundant opportunities for recreation, be it fishing, water skiing, swimming or just plain loafing along their scenic shores. The Texas Water Plan proposes the construction of 67 major dams and reservoirs, or alternates, during the next 50 years or so to provide water needed by the people of Texas for their cities and towns, their industry, and for their agriculture. These reservoirs will also serve other useful and beneficial purposes, including recreation.

And the 35 counties that most of East Texas stand to gain immeasurable benefits from the Texas Water Plan. The Plan proposes the construction of 28 dams and reservoirs in this historic and exciting section of Texas in addition to the other facilities needed to provide water for Texans.

The benefits to East Texans—today and in the future—are staggering. Not only does the Plan provide an assured water supply for East Texas villages, towns and cities and the industry that abounds throughout the region, it will provide a more viable economic base which will not be limited because of lack of water.

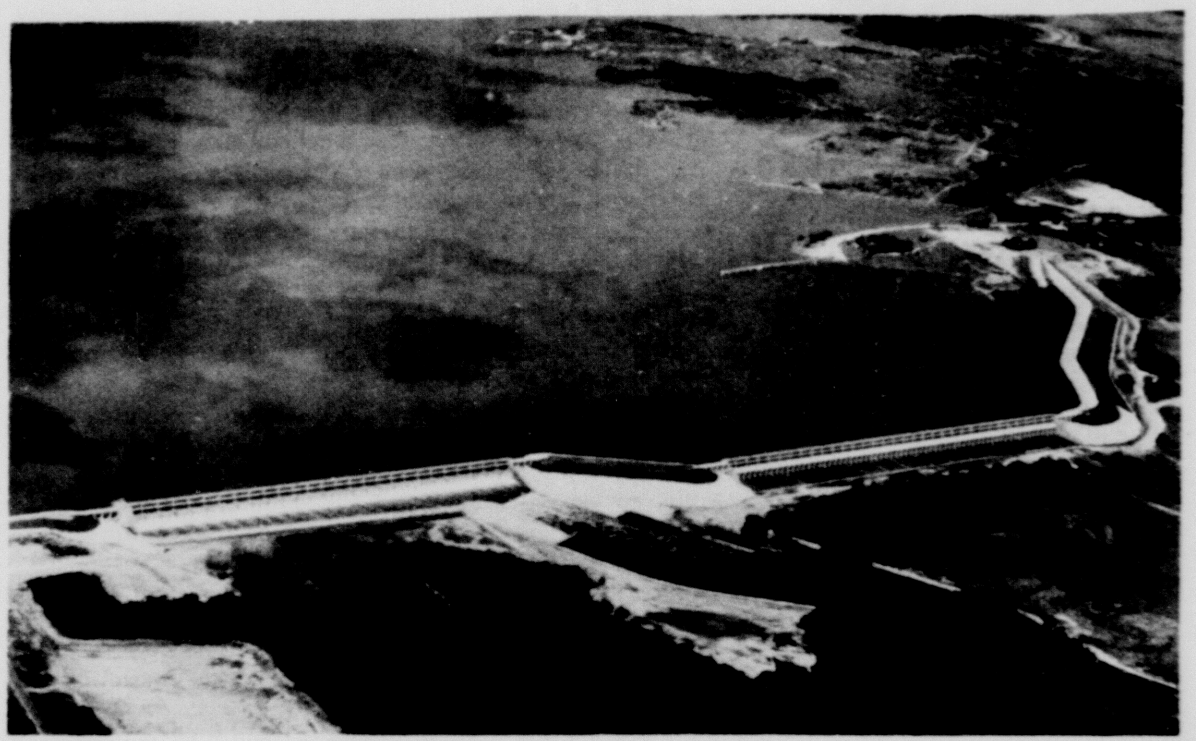
The Texas Water Plan is based on the premise that there will be no interference with vested rights under existing water permits. The basin of origin provisions of the Texas Water Development Act provides legal basis for protection of intrabasin rights. There is no comparable legal protection in federal law or policies nor in other Texas statutes that provide such protection.

Reasonable intrabasin needs for all beneficial purposes developing within the next ensuing 50-year period will have absolute priority of right over exportation for out-of-basin demands except on a temporary interim basin.

Not only will these reservoirs provide an assured water supply for the future, many other economic benefits will accrue to the region.

During construction of the 28 dams and reservoirs and other facilities proposed by the Texas Water Plan in the region, more than $2.2 billion will be expended. This will contribute greatly to the economy of East Texas by providing jobs, demands for services, and sale of supplies by merchants and others in the region.

Recreation benefits to the region are expected to exceed $180 million annually by 2020 after full development of the water resources in East Texas.



Water For Texans

Continued from p-3

. . . WATER PLANS

west Texas and the Coastal Canal from the Lower Rio Grande Valley, building eastward. The Plan calls for construction of the dams and cannal to begin in 1975, with delivery of interim supplies of water from these projects scheduled in 1980 into the Coastal Canal.

Construction of the Eastern and Trans-Texas divisions, with their reservoirs and transmission facilities, is scheduled to begin in 1977, with first delivery of water in 1985. It is anticipated that construction of the import system will begin in 1980, with delivery of water coming in 1988.

Water available as surplus from the Northeast Texas basins would move westward first, supplying the requirements of the Dallas-Fort Worth complex as needed, and other West Texas requirements.

As facilities from the Mississippi River are completed, additional water to West Texas, plus the 1.5 million acre feet annually for New Mexico, would be moved through the Trans-Texas Division facilities as rapidly as municipal demands increase and as irrigation distribution systems facilities are constructed to serve the land.

When the Coastal Canal is completed east to the Sabine River, Mississippi River water can be brought directly into the Coastal Division to supplement eastern basin water providing 2020 project requirements in the area supplied by the Coastal Division.

Projects proposed by the Plan include dams and reservoirs to meet local water requirements throughout the state and to provide flood control and other benefits to the area and to the state. Navigation, hurricane protection projects, upstream watershed-protection programs, drainage of wetlands, natural salinity alleviation projects, and phreatophyte control projects are included in the Plan.

"No water resource development program on this scale or of this complexity has ever been attempted anywhere," commented Howard B. Boswell, executive director of the Texas Water Development Board.
